Green Communication Technologies for Future Networks Gurjit Kaur, Akanksha Srivastava, 2022-10-31 This book explores all the energy efficient communication technologies used for various communication systems and every aspect of these systems such as green electronics network protocols handover codes antenna and the role of artificial intelligence and IoT including the energy management strategies It identifies the development of sustainable plans and programs at the communication level within the current legislative framework Features Gives a fundamental description of the green communications including granularities of green wired and wireless systems Describes a comprehensive review of innovations challenges and opportunities for green communication Provides guiding principles on how to build the green communication network Includes a holistic view of both wireless and wired green communication systems with an emphasis on applications and challenges in each area Suggests various ways of benchmarking and measuring the performance of green communication systems This book will be of great interest to graduate students and researchers in green technologies communications wireless communication optical communication underwater communication microwave and satellite communication networking the internet of things and energy management

Emerging Communication Technologies Based on Wireless Sensor Networks Mubashir Husain Rehmani, Al-Sakib Khan Pathan, 2016-04-05 This book fills a gap in the existing literature by combining a plethora of WSN based emerging technologies into a single source so that reviewers can form opinions regarding these technologies It presents different types of emerging communication technologies based on WSNs and describes how wireless sensor networks can be integrated with other communication technologies It covers many of the new techniques and demonstrates the application of WSNs The book is composed of 14 chapters divided into four parts

Broadcasting and Optical Communication Technology Richard C. Dorf, 2017-12-19 In two editions spanning more than a decade The Electrical

Engineering Handbook stands as the definitive reference to the multidisciplinary field of electrical engineering. Our knowledge continues to grow and so does the Handbook. For the third edition it has been expanded into a set of six books carefully focused on a specialized area or field of study. Broadcasting and Optical Communication Technology represents a concise yet definitive collection of key concepts, models, and equations in the fields of broadcasting and optical communication thoughtfully gathered for convenient access. Addressing the challenges involved in modern communications networks, Broadcasting and Optical Communication Technology explores communications information theory and devices covering all the basic information needed for a thorough understanding of these areas. It also examines the emerging areas of adaptive estimation and optical communication including lightwave technology, long distance fiber optic communications, and photonic networks. Articles include defining terms, references, and sources of further information. Encompassing the work of the world's foremost experts in their respective specialties, Broadcasting and Optical Communication Technology presents the latest developments, the broadest scope of coverage, and new material on mobile communications. It offers fast, convenient access to specialists in need of detailed reference on the job.

The Proceedings of 2024 International Conference on Artificial Intelligence and Autonomous Transportation Limin Jia, Dechen Yao, Feng Ma, Liguang Zhang, Yuejian Chen, Qingwan Xue, 2025-03-27. This book reflects the latest research trends, methods, and experimental results in the field of Artificial Intelligence and Autonomous Transportation, which covers abundant state-of-the-art research theories and ideas. As a vital research area that is highly relevant to current developments in a number of technological domains, the topics covered include Autonomous Transportation Systems, Autonomous Transportation Management and Control Technology, Autonomous Transportation Equipment Technology, Vehicular Networking and Information Security, Emerging Technologies, and Future Mobility. Intelligent water transportation technology, Cross Domain Transportation Technology, and so on. The goal of the proceedings is to provide a major interdisciplinary forum for researchers, engineers, academics, and industry professionals to present the most innovative research and development in the field of Artificial Intelligence and Autonomous Transportation. Engineers and researchers from academia, industry, and government will also explore an insight view of the solutions that combine ideas from multiple disciplines in this area. The volumes serve as an excellent reference work for researchers and graduate students working in the areas of rail transportation, electrical engineering, and information technology.

A Manager's Primer on e-Networking Dragan Nikolic, 2012-09-10. The implementation of Enterprise Networks or e-Networking is of paramount importance for organisations. Enterprise wide networking would warrant that the components of information architecture are organised to harness more out of the organisation's computing power on the desktop. This would also involve establishment of networks that link the various but important subsystems of the enterprise. Our firm belief is that in order to gain a competitive edge, the organisations need knowledge and sound strategy. This conviction is particularly true today considering the pressures from international competition, environmental concerns, and complicated ethical issues. This

book entitled A Manager's Primer on e Networking negotiates the hyper dimensions of the Internet through stories from myriad of Web sites with its fluent presentation and simple but chronological organisation of topics highlighting numerous opportunities and providing a solid starting point not only for inexperienced entrepreneurs and managers but anyone interested in applying information technology in the business I sincerely hope the book will help as well many small and medium size companies and organisations to launch corporate networking successfully in order to attain their strategic objectives Rajiv Jayashankar Ph D
