

The background of the entire cover is a black and white photograph. It depicts several industrial smokestacks in the lower half of the frame, each emitting a thick, dark plume of smoke that rises into the sky. The sky is filled with large, dramatic clouds, with a bright light source, possibly the sun, breaking through the clouds on the right side, creating a strong contrast and highlighting the edges of the clouds and smoke.

Organic Marxism Alternative Catastrophe Civilization:

Organic Marxism Philip Clayton, Justin Heinzekehr, 2014-09-19 This revolutionary book fuses the enduring legacy of socialism government for the common good with the best of the environmental movement and the newest insights from sustainability studies The result is a manifesto a roadmap forward in the face of the growing environmental catastrophe which is the most complex crisis humanity has ever faced American conservatives like to say that Marxism was destroyed by its opponents and by the mistakes of Marxist governments Organic Marxism provides the definitive answer to this charge As we approach the planet's limits however there is no other option but to shift to an organic ecological civilization Clayton and Heinzekehr show how scientists and economists farmers and small business people artists and religious leaders are coming together around the globe building communities for the common good

Organic Marxism Dean of Claremont School of Theology Philip Clayton, Justin Heinzekehr, 2014-09-19 This revolutionary book fuses the enduring legacy of socialism government for the common good with the best of the environmental movement and the newest insights from sustainability studies The result is a manifesto in the tradition of Bill McKibben's *Eaarth* a roadmap forward in the face of the growing environmental catastrophe which is the most complex crisis humanity has ever faced Catherine Keller writes What an unexpected discomfiting and important work If Marxism seemed to be abandoned in the West to a few academic leftists and nostalgic activists the authors bring it roaring back into relevance American conservatives like to say that Marxism was destroyed by its opponents and by the mistakes of Marxist governments Organic Marxism provides the definitive answer to this charge New economic evidence reveals that Marx's predictions are coming true in ways once thought impossible Today the wealthiest class the richest 1% possesses more wealth and power than ever before whereas the 99% are slipping economically and the majority of humans live in increasing poverty Above all else the global environmental crisis changes everything Clayton and Heinzekehr show how over the last decades rich individuals and multinational corporations have acted selfishly to increase their own wealth with devastating ecological consequences The data make it clear that the planet has reached the limits of its capacity The authors trace the unimaginable environmental and social consequences that scientists tell us global warming will bring mass extinctions food and water shortages violent weather rising oceans Why then do our governments continue to favor the wealthy Why do they take no action or actually worsen the situation Organic Marxism shows why the situation is not hopeless however The vast majority of humans favor sustainable systems and lifestyles With this growing support it's possible to begin laying the foundations for a new ecological civilization on this planet In these pages Clayton and Heinzekehr lay out the steps toward a fair and sustainable society one run not in the interests of the rich but for the common good This fresh energetic and revolutionary manifesto Santiago Slabodsky takes its leads from the core insights of Karl Marx from process philosophers in China Taoism and in the West Alfred North Whitehead from ecology and from the organic practices of sustainable communities This postmodern Marxism the authors argue is not

deterministic and utopian It allows for market forces while limiting corruption and excessive profit taking by the wealthy In the end localized systems of production and trade steeped in the cultural traditions of a given people are far more sustainable and life affirming than a globalized economy run by the richest banks and multinational corporations The book is a call to action We can no longer sit by passively and allow unlimited consumption by the wealthy when it means that there will be nothing left for our grandchildren Without a planetary crisis the rich would remain in power As we approach the planet s limits however there is no other option but to shift to an organic ecological civilization Clayton and Heinzekehr show how scientists and economists farmers and small business people artists and religious leaders are coming together around the globe building communities for the common good The Galapagos Islands Brian D. McLaren,2019-10-01 Bestselling author

Brian D McLaren followed his love of nature specifically tortoises all the way to the Galapagos Islands There he paid close attention to the flora and fauna around him but also to what was happening within him how the natural world awakened his soul in a way that organized religion could not McLaren s descriptions of birds and reptiles fish and flowers sing he walks in the footsteps of Charles Darwin and grieves that Darwin has been demonized by his fellow Christians and he reflects on how his own faith has evolved in the years since he left the pastorate McLaren writes in the spirit of Aldo Leopold and Wendell Berry weaving together the spiritual and the material Even though most readers will never visit the Galapagos Islands they can travel with McLaren and experience the beauty and fragility of this extraordinary place **God and Gravity** Philip Clayton,2018-08-23 Philip Clayton is well known as a major thinker working at the interface of science philosophy and Christian theology Here for the first time a representative selection of his far reaching works have been brought together into one place After a general introduction to the breadth of Clayton s writing the book is divided into six main sections 1 Science 2 Science Faith 3 Panentheistic Reflections on Science 4 Science 5 Science Spirit and 6 Progressive Theology This introduction and reader will become the go to text for all inquiries regarding Philip Clayton s expansive theology

Transcultural Connections: Australia and China Greg McCarthy, Youzhong Sun, Xianlin Song,2021-10-25 This book is a unique and original contribution to the knowledge of transcultural engagement between the East and the West notably between China and Australia The collection explores how the global system universally interrelates East and West showing how this interrelatedness offers the promise of progress but can evoke the counteracting trend of tribal nationalism The book addresses the connectedness of human progress by exploring how globalization creates new dynamic interfaces between East and West and how rather than clashes of culture there are growing forms of reciprocity between civilizations and a shared awareness of how humanity is connected through knowledge and international mobility **T&T Clark Handbook of Christian Theology and Climate Change** Hilda P. Koster, Ernst M. Conradie,2019-12-12 The T these essays are critically engaged by respondents situated in other geographic regions minority communities non Christian traditions or non theological disciplines Structured in seven main parts the handbook explores 1 the need for collaboration with disciplines

outside of Christian theology to address climate change 2 the need to find common moral ground for such collaboration 3 the difficulties posed by collaborating with other Christian traditions from within 4 the questions that emerge from such collaboration for understanding the story of God's work and 5 God's identity and character 6 the implications of such collaboration for ecclesial praxis and 7 concluding reflections examining whether this volume does justice to issues of race gender class other animals religious diversity geographical divides and carbon mitigation This rich ecumenical cross cultural conversation provides a comprehensive and in depth engagement with the theological and moral challenges raised by anthropogenic climate change
