Organised Crime in Europe Cyrille Fijnaut, Letizia Paoli, 2004-12-09 This volume represents the first attempt to systematically compare organised crime concepts as well as historical and contemporary patterns and control policies in thirteen European countries. These include seven old EU Member States, two new members, a candidate country and three non EU countries. Based on a standardised research protocol, thirty three experts from different legal and social disciplines provide insight through detailed country reports. On this basis the editors compare organised crime patterns and policies in Europe and assess EU initiatives against organised crime.

Corruption and Organized Crime in Europe Philip Gounev, Vincenzo Ruggiero, 2012 In *Corruption and Organised Crime in Europe* Gounev and Ruggiero present a discussion of the relation between organized criminals and corruption in the EU's 27 Member States. The book draws on research and scholarly work the editors carried out respectively within the Center for the Study of Democracy CSD in Bulgaria and within academic institutions as well as on behalf of the European Commission and the United Nations. Combining empirical data and theoretical debates the book focuses on three main areas of the relationship between corruption and organised crime: public bodies, the private sector and criminal markets. It presents the findings of a recent research project carried out by the CSD on behalf of the European Commission providing an analysis of the specific national contexts in which corruption and organized crime thrive. The essays also address institutional responses and policies focusing particularly on how EU Member States attempt to sever the links between the official economy, the political sphere and organized crime. The second part of the book presents case studies written by some of the foremost international experts on the subject matter analysing corrupt exchange and criminal organisations concentrating on specific European countries: Bulgaria, France, Greece, Italy, Russia, Spain and the UK. As the first comprehensive study of corruption and organised crime in the countries of the European Union the book will be a valuable resource for students and scholars of criminology, sociology, law and international politics as well as policy makers and law enforcement agencies.

Measuring Organised Crime in Europe Tom Beken, 2004 Recent years have been characterised by growing awareness among European member states about serious shortcomings to the way organised crime is measured and assessed. Currently organised crime reports primarily generate descriptive analyses of a past situation based on law enforcement data and do not always provide the necessary information for proactive and preventive policy strategies. Therefore an EU Action Plan has been issued to develop a more future oriented and risk based methodology for the measurement of organised crime and to convert the traditional organised crime situation reports into strategic reports for planning purposes. This book is the outcome of two studies undertaken by a team composed of Belgian, Italian and Swedish researchers for the European Commission. It presents an overview of current practices in the measurement of organised crime in Europe and includes a discussion about the concept and the assessment of the impact of the phenomenon. Further the feasibility of the implementation of the existing EU Action Plan was studied and evaluated. As a result of applied research
