Prasad,2021-09-28 A cutting edge look at how accelerating financial change from the end of cash to the rise of cryptocurrencies will transform economies for better and worse We think we ve seen financial innovation We bank from laptops and buy coffee with the wave of a phone But these are minor miracles compared with the dizzying experiments now underway around the globe as businesses and governments alike embrace the possibilities of new financial technologies As Eswar Prasad explains the world of finance is at the threshold of major disruption that will affect corporations bankers states and indeed all of us The transformation of money will fundamentally rewrite how ordinary people live Above all Prasad foresees the end of physical cash The driving force won t be phones or credit cards but rather central banks spurred by the emergence of cryptocurrencies to develop their own more stable digital currencies Meanwhile cryptocurrencies themselves will evolve unpredictably as global corporations like Facebook and Amazon join the game The changes will be accompanied by snowballing innovations that are reshaping finance and have already begun to revolutionize how we invest trade insure and manage risk Prasad shows how these and other changes will redefine the very concept of money unbundling its traditional functions as a unit of account medium of exchange

and store of value The promise lies in greater efficiency and flexibility increased sensitivity to the needs of diverse consumers and improved market access for the unbanked The risk is instability lack of accountability and erosion of privacy A lucid visionary work The Future of Money shows how to maximize the best and guard against the worst of what is to come

Choosing Help Tracy Stecker, 2025-12-30. Why do so many people resist getting help even when their lives depend on it? In Choosing Help, psychologist Tracy Stecker, PhD, offers a compassionate and evidence based guide to understanding the deep rooted reasons why individuals avoid treatment for mental health and substance use issues and how to help them move toward change. Drawing on decades of clinical research and real world experience, Dr. Stecker explores the psychological barriers that keep people from seeking support from fear and shame to mistrust and denial. Rather than placing the burden solely on families or communities, Choosing Help introduces a groundbreaking intervention model designed to shift the individual's own mindset, making the decision to seek help not just possible but empowering. Each chapter of Choosing Help dives into a specific mindset that keeps people from seeking support. You'll meet individuals who believe

treatment won't work who insist they're not ready or who feel they don't need help at all. Others are convinced they can handle it on their own fear being forced into the wrong kind of treatment or struggle with the vulnerability of opening up. Through these stories and insights Dr. Stecker reveals how these beliefs form and how they can be gently challenged and transformed. With clear analysis, relatable case studies, and actionable strategies, *Choosing Help* equips readers with the tools to recognize resistance, respond with empathy, and guide themselves or others toward healing. Whether you're a clinician, caregiver, loved one, or someone wrestling with your own reluctance, this book is a vital resource for making help feel like a choice, not a confrontation.
