Heart, Cosmic Heart Thomas Cowan,2016-10-22 This book is life changing for those trying to understand their own bodies or those of loved ones and it s truly transformative in the hands of medical professionals especially young doctors Foreword Reviews Thomas Cowan was a 20 year old Duke grad bright skeptical and already disillusioned with industrial capitalism when he joined the Peace Corps in the mid 1970s for a two year tour in Swaziland There he encountered the work of Rudolf Steiner and Weston A Price two men whose ideas would fascinate and challenge him for decades to come Both drawn to the art of healing and repelled by the way medicine was and continues to be practiced in the United States Cowan returned from Swaziland went to medical school and established a practice in New Hampshire and later San Francisco For years as he

raised his three children suffered the setback of divorce and struggled with a heart condition he remained intrigued by the work of Price and Steiner and in particular with Steiner's provocative claim that the heart is not a pump. Determined to practice medicine in a way that promoted healing rather than compounded ailments, Cowan dedicated himself to understanding whether Steiner's claim could possibly be true. And if Steiner was correct, what then is the heart? What is its true role in the human body? In this deeply personal, rigorous and riveting account, Dr. Thomas Cowan offers up a daring claim: Not only was Steiner correct that the heart is not a pump, but our understanding of heart disease with its origins in the blood vessels is completely wrong. And this gross misunderstanding with its attendant medications and risky surgeries is the reason heart disease remains the most common cause of death worldwide. In *Human Heart Cosmic Heart*, Dr. Thomas Cowan presents a new way of understanding the body's most central organ. He offers a new look at what it means to be human and how we can best care for ourselves and one another. This book deserves to be in everyone's library. It's loaded with great information and it can save your life or the life of someone you love. Dr. Joseph Mercola
