The Effects of Wood Debris and Drift Logs on Estuarine Beaches of Northern Puget Sound Thomas Terich, 1977

The Lumber Co-operator, 1962 *Explanation and Human Action* A. R. Louch, **Statistics as Principled**

Argument Robert P. Abelson, 2025-11-04 In *Statistics as Principled Argument* first published in 1995 Robert P Abelson exposes the often overlooked problems in quantitative data interpretation and the challenge of presenting the data in terms of a coherent narrative about one's research This classic edition offers a new introduction which views Abelson's work through a contemporary lens highlighting how his teachings remain vitally relevant today The focus of the book is that the purpose of statistics is to organize a useful argument from quantitative evidence using a form of principled rhetoric Five criteria described by the acronym MAGIC magnitude articulation generality interestingness and credibility are proposed as crucial features of a persuasive principled argument Statistical methods are discussed but with minimum use of formulas and heavy data sets The ideas throughout the book revolve around elementary probability theory t tests and simple issues of research design Many examples are included to explain the connection of statistics to substantive claims about real phenomena This remarkably engaging read is filled with fascinating real life and real research examples rather than simply recipes for analysis Abelson's insights generate true interest for beginning graduate students and seasoned researchers alike and will be invaluable to students scholars researchers and practitioners who use statistics within their research

Mathematical Constants Steven R. Finch, 2003-08-18 Steven Finch provides 136 essays each devoted to a mathematical constant or a class of constants from the well known to the highly exotic This book is helpful both to readers seeking information about a specific constant and to readers who desire a panoramic view of all constants coming from a particular field for example combinatorial enumeration or geometric optimization Unsolved problems appear virtually everywhere as well This work represents an outstanding scholarly attempt to bring together all significant mathematical constants in one place

Mathematics for Biological Scientists Mike Aitken, Bill Broadhurst, Stephen Hladky, 2009-09-30 *Mathematics for Biological Scientists* is a new undergraduate textbook which covers the mathematics necessary for biology students to understand interpret and discuss biological questions The book's twelve chapters are organized into four themes The first theme covers the basic concepts of mathematics in biology discussing the mathematics used in biological quantities processes and structures The second theme calculus extends the language of mathematics to describe change The third theme is probability and statistics where the uncertainty and variation encountered in real biological data is described The fourth theme is explored briefly in the final chapter of the book which is to show how the tools developed in the first few chapters are used within biology to develop models of biological processes *Mathematics for Biological Scientists* fully integrates mathematics and biology with the use of colour illustrations and photographs to provide an engaging and informative approach to the subject of mathematics and statistics within biological science *Correspondence of James K.*

Polk: 1817-1832 James Knox Polk, 1969 In the second half of 1845 the focus of Polk's correspondence shifted from those issues relating to the formation of his administration and distribution of part patronage to those that would give shape and consequence to his presidency the admission of Texas preparation for its defense restoration of diplomatic relations with Mexico and termination of joint occupancy of the Oregon Country For the most part the incoming letters tended to urge rather more militancy on the Texas and Oregon questions than Polk would adopt and notions of national destiny registered a singular theme of buoyant confidence in taking on both Mexico and Great Britain if military action should be required President Polk and Secretary of State James Buchanan succeeded in both using and controlling the surge of nationalism that heightened expectations for expansion westward Polk and Buchanan agreed on the importance of reestablishing diplomatic relations with Mexico but the President chose to take a personal hand in managing the selection and instruction of John Slidell whose departure for Vera Cruz would not be made public until he had arrived in Mexico Polk wanted to give the fledgling Mexican administration of Jose Joaquin Herrera a chance to compose Mexico's differences with Washington free of contrary pressures from Great Britain and France and he fully understood the price that Herrera might pay for a peaceful settlement of the Texas question If Mexico required more than 6 million for the purchase of their two most northern provinces as provided in his instructions Slidell might agree to any reasonable additional sum Slidell's mission probably never had much chance of success for without control of his military the Herrera administration could neither give up its claim to Texas nor overcome British opposition to the sale of New Mexico and Upper California Within but a few days of Slidell's arrival in the Mexican capital Mariano Paredes y Argilla organized a military coup put the Herrera government to flight and on January 2 1846 declared himself interim president of Mexico Polk left on the table his predecessor's initiative to divide the Oregon Country at the 49th parallel with all of Vancouver Island going to the British The summary rejection of that offer by the British minister to Washington Richard Packenham so angered Polk that on August 30th he formally withdrew all prior offers to settle the dispute The British foreign secretary Lord Aberdeen disavowed and assured the U S minister to Britain Louis McLane that no ultimatum had been sanctioned by his government Buchanan tried in vain to soften Polk's decision to initiate further negotiations but he had determined to give the required one year advance notice prior to abrogating the treaty of joint occupancy Accordingly in his First Annual Message to Congress Polk asked for a joint resolution terminating Oregon agreements with Great Britain Polk received high praise for his Message and its hard line on Texas and Oregon In addition to the texts briefs and annotations the editors have calendared all of the documents for the last six months of 1845 Entries for unpublished letters include documents dates addresses classifications repositories and precis The Polk Project is sponsored by the University of Tennessee and assisted by grants from the National Historical Publications and Records Commission the Nations Endowment for the Humanities and the Tennessee Historical Commission The Authors Wayne Cutler is research professor of history at the University of Tennessee He earned his bachelor's degree at Lamar

University and his master s and doctor s degrees and University of Texas at Austin Professor Cutler became director of the Polk Project in 1975 served as associate editor in the fourth volume of the correspondence and headed the editorial team in the preparation of the series fifth and subsequent volumes He began his professional career
