## **Naturalistic Inquiry:**

*Naturalistic Inquiry* Yvonna S. Lincoln, Egon G. Guba, 1985-04 Showing how science is limited by its dominant mode of investigation Lincoln and Guba propose an alternative paradigm a naturalistic rather than rationalistic method of inquiry in which the investigator avoids manipulating research outcomes A paradigm shift is under way in many fields they contend and go on to describe the different assumptions of the two approaches regarding the nature of reality subject object interaction the possibility of generalization the concept of causality and the role of values The authors also offer guidance for research in the field where they say naturalistic inquiry always takes place Useful tips are given for example on designing a study as it unfolds establishing trustworthiness and writing a case report This book helps researchers both to understand and to do naturalistic inquiry Of particular interest to educational researchers it is valuable for all social scientists involved with questions of qualitative and quantitative methodology

**Doing Naturalistic Inquiry** David A. Erlandson, Edward L. Harris, Barbara L. Skipper, Steve D. Allen, 1993-07-07 While much has been written on alternative paradigm research there is little concrete advice on how to effectively use the theoretical notions of naturalistic inquiry in practice *Doing Naturalistic Inquiry* is the practical guide designed to help beginning researchers apply the constructivist paradigm Based upon the theoretical work of Lincoln and Guba in developing the naturalistic or constructivist paradigm Erlandson and his colleagues show readers how these ideas shape the practice of conducting alternative paradigm research The book covers the research process from design through data collection analysis and presentation and examines important issues generally minimized in positivist research texts ethics trustworthiness and authenticity Cases from a wide variety of disciplines demonstrate the efficacy of the methods described *Doing Naturalistic Inquiry* is a highly useful teaching tool for anyone using a constructivist lens on research

various aspects of naturalistic inquiry with the chapters following an organization similar to the stages of a study. Chapters 1 and 2 provide a background to the theory of such studies as well as practice studies that can aid new researchers in getting started. Chapters 3 through 5 describe the methodology of naturalistic inquiry including data collection, analysis, and report writing, and the final three chapters present a variety of practical suggestions for applying naturalistic inquiry to the library field. This volume will be an appropriate text for courses in quantitative research methods and library information studies, sociology, anthropology, and education. It will also be a relevant work for librarians and administrators interested in research methods and evaluation and a valuable addition to both university and public libraries.
