thesis examines the impact of the Civil Service Reform Act CSRA of 1978 on performance evaluation at the field activity level
Reviews of both the CSRA and various methods of performance appraisal are conducted in order to analyze performance
evaluation characteristics relative to the requirements of the CSRA for performance appraisal The results of this analysis
were then compared to specific positions within Naval activity comptroller departments to demonstrate how the basis for a
standardized framework for evaluations can be developed for Navy wide applications Sets of potential critical elements for
three specific positions were derived based on this framework and an example of performance standards for a specific
critical element was shown In conclusion this thesis makes several recommendations for ensuring that the intent of the CSRA
requirement for flexibility of performance evaluation is maintained while allowing guidance and standardization from higher
