Machine (Classic Reprint) Fred T. Jane, 2015-07-14 Excerpt from Your Navy as a Fighting Machine What is a capital ship It is a vague sort of term that is frequently employed nor is much further information usually to be gleaned than that it is a battleship If there be one thing more than another Of which the general public is supremely ignorant that thing is a battleship They may know its guns they may know its displacement speed and various other details the sort of thing to be found in every explanatory footnote in the daily Press But it is safe to wager that not one man in a million in all the British Empire knows exactly what a battleship is for All have a vague idea because it so chances that people think in Dreadnoughts and they all know that Dreadnoughts are somewhere in the top line of battleships About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **War at**

A portrait in words and photographs of the interwar Navy this book examines the twenty year period that saw the U S fleet shrink under the pressure of arms limitation treaties and government economy and then grow again to a world class force

The authors trace the Navy's evolution from a fleet centered around slow battleships to one that deployed most of the warship types that proved so essential in World War II including fast aircraft carriers heavy and light cruisers sleek destroyers powerful battleships and deadly submarines Both the older battleships and these newer ships are captured in stunning period photographs that have never before been published An authoritative yet lively text explains how and why the newer ships and aircraft came to be Thomas Hone and Trent Hone describe how a Navy desperately short funds and men nevertheless pioneered carrier aviation shipboard electronics code breaking and with the Marines amphibious warfare elements that made America's later victory in the Pacific possible Based on years of study of official Navy department records their book presents a comprehensive view of the foundations of a navy that would become the world's largest and most formidable At the same time the heart of the book draws on memoirs novels and oral histories to reveal the work and the skills of sailors and officers that contributed to successes in World War II From their service on such battleships as West Virginia to their efforts ashore to develop and procure the most effective aircraft electronics and ships from their adventures on Yangtze River gunboats to carrier landings on the converted battle cruisers Saratoga and Lexington the men are profiled along with their ships This combination of popular history with archival history will appeal to a general audience of naval enthusiasts
