Near Field Communications Handbook Syed A. Ahson,Mohammad Ilyas,2016-04-19 From basic concepts to research grade material and future directions the Near Field Communications Handbook provides comprehensive technical coverage of this rapidly emerging field Walking readers through emerging applications it offers a glimpse at a future in which near field communication NFC technology is fully integrated into daily life

Principles of Inductive Near Field Communications for Internet of Things Johnson I. Agbinya,2022-09-01 Near field communication devices and the emerging field of Internet of things require efficient short range communication techniques Classical telecommunication theory however has so far focused on radiating electromagnetic signals which is more suited to terrestrial communication systems Over the last decade however considerable research and applications of inductive methods have emerged as innovative approaches for secure short range communications by changing the paradigm of an established model of electromagnetic communications We have witnessed the emergence of embedded inductive medical devices magneto inductive waveguides inductive pots and cooking devices magneto inductive sensors wireless power transfer inductive hearing aids and the emerging inductive point to point communication specifically termed near field communication NFC as used in mobile phones and payment cards to name a few While there exist a large set of distributed methods and algorithms detailing the design and performances of such applications a significant gap is observed as a lack of detailed collection of the methods in one place which could be easily understood and used quickly by someone seeking to apply the methods In this book this missing gap is filled with the required details and the theory of near field communication systems including both the radiating and reactive energy coupling near field systems in addition to the well known far field radiation techniques The book details the fundamental expressions and design methods which facilitate the creation of near field devices and equipment including embedded biomedical implants The book contains recent advances in inductive communications performance limitations and a collection of applications It also lays a strong foundation for the application of inductive methods for creating Internet of Things systems

Ambient Assisted Living Sauro Longhi,Pietro Siciliano,Michele Germani,Andrea Monteriù,2014-05-28 This book presents the refereed proceedings of the Fourth Italian Forum on Ambient Assisted Living AAL held in Ancona Italy in October 2013 A wide range of issues are covered and new technological developments are described which will support the autonomy and independence of individuals with special needs through an innovative and integrated approach designed to respond to the socio economic challenges of an aging population Topics addressed include health and well being prevention

and rehabilitation and support for care providers active aging and its social implications services for the frail elderly with health problems and their families nutrition ICT platforms technologies for the benefit of the elderly home automation and control technologies autonomy safety and energy saving smart cities and smart communities telemedicine telerehabilitation and telecare mobility participation and social inclusion games and fun for the elderly building design social housing interface design and interaction accessibility acceptance social policies to encourage and support active aging business models market analysis and development of sustainable financing and business and ethics privacy and data protection Many experimental validations based on user trials and usability testing are presented and discussed The knowledge and insights provided in this book will help researchers and others involved in AAL to understand relevant societal trends novel technological developments and pressing challenges

Mike Meyers CompTIA Network+ Guide to Managing and Troubleshooting Networks, Fourth Edition (Exam N10-006) Mike Meyers, 2015-05-29 Essential Skills for a Successful IT Career Written by Mike Meyers, the leading expert on CompTIA certification and training, this up-to-date full-color text will prepare you for CompTIA Network exam N10-006 and help you become an expert networking technician. Fully revised for the latest CompTIA Network exam, including coverage of performance-based questions, the book contains helpful on-the-job tips, end-of-chapter practice questions, and hundreds of photographs and illustrations. Mike Meyers' *CompTIA Network Guide to Managing and Troubleshooting Networks*, Fourth Edition, covers Network architectures, Cabling and topology, Ethernet basics, Network installation, TCP/IP applications, and network protocols. Routing, Network naming, Advanced networking devices, IPv6, Remote connectivity, Wireless networking, Virtualization, and cloud computing. Network operations, Managing risk, Network security, Network monitoring, and troubleshooting. Electronic content includes 100 practice exam questions in a customizable test engine, 20 lab simulations to help you prepare for the performance-based questions, One hour of video training from Mike Meyers, Mike's favorite shareware and freeware networking tools and utilities. Each chapter features Learning objectives, Photographs and illustrations, Real world examples, Try This and Cross Check exercises, Key terms highlighted, Tech Tips, Notes and Warnings, Exam Tips, End of chapter quizzes and lab projects, Instructor resources available, Instructor's Manual, Power Point slides for each chapter with photographs and illustrations from the book, Test Bank cartridges with hundreds of questions for use as quizzes and exams. Answers to the end-of-chapter sections are not printed in the book and are only available to adopting instructors.

Applicability of Mobile Marketing in the Marketing Mix of Trade Fair Organizers Immo Prenzel, 2010-04 Master's Thesis from the year 2009 in the subject Business economics / Offline Marketing and Online Marketing, grade: 1.3, Cologne Business School KIn Fakultät für Wirtschaftswissenschaften, language: English, abstract: Executive Summary: Trade fair organizers face an intensified inter and intra industry competition and increasing customer requirements towards efficiency and convenience of the trade fair events. In order to stay competitive, trade fair companies have to integrate new market oriented marketing measures to improve their customer communication, extend their service

portfolio and thusly satisfy the customer needs In this context the applicability of mobile marketing in the marketing mix of trade fair organizers was researched in this thesis It was asserted that mobile marketing is a significant global trend with enormous growth potential as far more people can be reached via the mobile channel than via any other marketing medium Thereby mobile marketing is not limited to its communication function but it is understood more comprehensively as the activity set of institutions and processes for creating communicating delivering and exchanging offerings that have value for customers clients partners and the society at large The mobile channel offers unique characteristics that distinguish it from other channels and allow a targeted customer communication However there are limitations to mobile marketing that were described within a general framework consisting of technological legal customer organizational and economical aspects Along this framework the main strategic approaches the push and pull approach were identified In the following trade fairs and its function its economy and participants were introduced The focus was put on the trade fair organizer as well as on the two most important customer groups the exhibitors and visitors Since the applicability of mobile marketing depends on these groups the structure goals and needs
