Indonesia Post-Pandemic Outlook: Strategy towards Net-Zero Emissions by 2060 from the Renewables and Carbon-Neutral Energy Perspectives Harun Ardiansyah, Putty Ekadewi, 2022-11-25 COVID 19 has disrupted all aspects of human life. To mitigate the impact of the pandemic several efforts have been taken including by Indonesian scholars abroad. This book entitled Indonesia Post Pandemic Recovery Outlook Strategy towards Net Zero Emissions by 2060 from the Renewables and Carbon Neutral Energy Perspectives explores energy sustainability and climate change issues and how it can progress further. There are also discussion on the delays caused by the COVID 19 pandemic to a few major renewable energy projects that should have been done in 2020 2021. Comprising of 14 chapters this book is divided into three sections. The first part Indonesia's Current Position and Strategy for Renewable Energy explores Indonesia's current position and strategy on New and Renewable Energy. This chapter also explores Indonesia's commitment towards Net Zero Carbon Emission 2060. Second Carbon Free and Renewable Energy in Indonesia discusses the status of renewable energy use in the world elaborate on the carbon impact of energy shift from fossil to renewable sources and introduce a new criterion in renewable energy carbon neutral energy. The last part Indonesia's New Strategy to Achieve Net Zero Emission in 2060 explores the macroeconomic benefits of renewable and carbon neutral energy deployment which are increasing energy security fueling GDP development creating job opportunities enhancing human welfare and achieving gender equality. We hope that this book can be a valuable reference for stakeholders policymakers as well as society to recover from the pandemic crisis and find better solutions to benefit future generations.

[Electric Motorcycle Charging Infrastructure Road Map for Indonesia](#) Asian Development Bank, 2022-10-01 Motorcycles are a major component of road transport in Indonesia with more than 120 million estimated to be in use While the number of motorcycles operating in the country has steadily grown in recent years the proportion of electric motorcycles remains very low A shift away from fossil fuel based motorcycles will provide considerable benefits for Indonesia by reducing air and noise pollution greenhouse gas emissions and reliance on fuel imports This report examines how such a shift can be achieved with a focus on electric motorcycle charging infrastructure It draws on best practices from other economies to provide a road map and policy recommendations for developing this infrastructure

[Global report on hypertension](#) World Health Organization, 2023-09-19 To amplify the stark reality of the disease burden from this silent killer WHO produced a Global report on hypertension This comprehensive report features unsettling statistics underscoring the far reaching consequences of uncontrolled hypertension ranging from heart attacks strokes and premature death to substantial economic loss Moreover the report offers a country by country snapshot of hypertension burden and control The report not only serves as an eye opener but also shows the way forward for countries to protect their people highlighting the tremendous strides made in managing the disease and drawing insights from the implementation of the WHO HEARTS package Additionally it equips countries with essential tools to enhance hypertension prevention control and surveillance thereby offering a roadmap towards a healthier future

[Africa regional overview of food security and nutrition 2020](#) Food and Agriculture Organization of the United Nations, United Nations Economic Commission for Africa, African Union Commission, 2021-06-29 Africa is not on track to meeting the Sustainable Development Goal SDG 2 targets to end hunger and ensure access by all people to safe nutritious and sufficient food all year

round and to end all forms of malnutrition The number of hungry people on the continent has risen by 47 9 million since 2014 and now stands at 250 3 million or nearly one fifth of the population The 2017 2018 and 2019 editions of this report explain that this gradual deterioration of food security was due to conflict weather extremes and economic slowdowns and downturns often overlapping A continued worsening of food security is expected also for 2020 as a result of the COVID 19 pandemic In addition to hunger across all countries in Africa millions of people suffer from widespread micronutrient deficiencies and overweight and obesity are emerging as significant health concerns in many countries This report shows that the food system in Africa does not provide food at a cost that makes nutritious food affordable to a majority of the population and this is reflected in the high disease burden associated with maternal and child malnutrition high body mass micronutrient deficiencies and dietary risk factors The report also shows that current food consumption patterns impose high health and environmental costs which are not reflected in food prices The findings presented in this report highlight the importance of prioritizing the transformation of food systems to ensure access to affordable and healthy diets for all produced in a sustainable manner

The State of Food Security and Nutrition in the World 2020

Food and Agriculture Organization of the United Nations ,International Fund for Agricultural Development,World Food Programme,World Health Organization,The United Nations Children's Fund,2020-07-01 Updates for many countries have made it possible to estimate hunger in the world with greater accuracy this year In particular newly accessible data enabled the revision of the entire series of undernourishment estimates for China back to 2000 resulting in a substantial downward shift of the series of the number of undernourished in the world Nevertheless the revision confirms the trend reported in past editions the number of people affected by hunger globally has been slowly on the rise since 2014 The report also shows that the burden of malnutrition in all its forms continues to be a challenge There has been some progress for child stunting low birthweight and exclusive breastfeeding but at a pace that is still too slow Childhood overweight is not improving and adult obesity is on the rise in all regions The report complements the usual assessment of food security and nutrition with projections of what the world may look like in 2030 if trends of the last decade continue Projections show that the world is not on track to achieve Zero Hunger by 2030 and despite some progress most indicators are also not on track to meet global nutrition targets The food security and nutritional status of the most vulnerable population groups is likely to deteriorate further due to the health and socio economic impacts of the COVID 19 pandemic The report puts a spotlight on diet quality as a critical link between food security and nutrition Meeting SDG 2 targets will only be possible if people have enough food to eat and if what they are eating is nutritious and affordable The report also introduces new analysis of the cost and affordability of healthy diets around the world by region and in different development contexts It presents valuations of the health and climate change costs associated with current food consumption patterns as well as the potential cost savings if food consumption patterns were to shift towards healthy diets that include sustainability considerations The report then

concludes with a discussion of the policies and strategies to transform food systems to ensure affordable healthy diets as part of the required efforts to end both hunger and all forms of malnutrition **Levels and trends in child malnutrition**
