## Target Review:

**Database Systems for Advanced Applications** Yunmook Nah, Bin Cui, Sang-Won Lee, Jeffrey Xu Yu, Yang-Sae Moon, Steven Euijong Whang, 2020-09-21 The 4 volume set LNCS 12112 12114 constitutes the papers of the 25th International Conference on Database Systems for Advanced Applications which will be held online in September 2020. The 119 full papers presented together with 19 short papers plus 15 demo papers and 4 industrial papers in this volume were carefully reviewed and selected from a total of 487 submissions. The conference program presents the state of the art R D activities in database systems and their applications. It provides a forum for technical presentations and discussions among database researchers, developers and users from academia, business and industry.

## **Recommender Systems Handbook**

Francesco Ricci, Lior Rokach, Bracha Shapira, 2022-04-21 This third edition handbook describes in detail the classical methods as well as extensions and novel approaches that were more recently introduced within this field. It consists of five parts: general recommendation techniques, special recommendation techniques, value and impact of recommender systems, human-computer interaction and applications. The first part presents the most popular and fundamental techniques currently used for building recommender systems such as collaborative filtering, semantic based methods, recommender systems based on implicit feedback, neural networks and context aware methods. The second part of this handbook introduces more advanced recommendation techniques such as session based recommender systems, adversarial machine learning for recommender systems, group recommendation techniques, reciprocal recommenders systems, natural language techniques for recommender systems, and cross domain approaches to recommender systems. The third part covers a wide perspective to the evaluation of recommender systems with papers on methods for evaluating recommender systems, their value and impact, the multi-stakeholder perspective of recommender systems, the analysis of the fairness, novelty and diversity in recommender systems. The fourth part contains a few chapters on the human-computer dimension of recommender systems with research on the role of explanation, the user personality and how to effectively support individual and group decision with recommender systems. The last part focusses on application in several important areas such as food, music, fashion and multimedia recommendation. This informative third edition handbook provides a comprehensive yet concise and convenient reference source to recommender systems for researchers and advanced level students focused on computer science and data science. Professionals working in data analytics that are using recommendation and personalization techniques will also find this handbook a useful tool.

**Mentoring New Special Education Teachers** Mary Lou Duffy, James W. Forgan, 2005 This field tested guide provides everything you need to effectively support and mentor your special education teachers increase their job satisfaction and keep your retention rates high.
