BiteSize Python for Intermediate Learners Di Wu, 2026-03-06 This book is an introduction to Python for intermediate learners. It allows readers to take a slow and steady approach to building upon their understanding of Python code. While there are many books, websites, and online courses about the topic, Python programming is broken down here into easily digestible lessons of less than 5 minutes each, following a tried and tested *BiteSize* approach. Each lesson begins with a clear and concise introduction to the topic, giving the reader a strong base to start from and gets them ready for deeper learning. This is followed by coding demonstrations that further explore the ideas discussed. The book offers practice tasks in different difficulty levels so readers can test their knowledge and grow their confidence. The reader will also play with case studies to solve real world problems. Tips on how to incorporate Generative AI into a learning toolkit are provided for purposes like feedback, practice exercises, code reviews, and exploring advanced topics. Recommended AI prompts can help readers identify areas for improvement, review key concepts, and track progress. This book is designed for intermediate learners with a basic understanding of Python. It is ideal for individuals with busy schedules or limited time for studying.

Become Your CEO Conrad Riker, 101-01-01 From Chaos to Command Engineer Your Life as a Sovereign Enterprise. Are you tired of feeling like a passive employee in your own life? Do you resent society's demands while your potential gathers dust? Have you sacrificed long term legacy for short term comfort? Would you bet on your current habits to outcompete rivals in a fractured world? This book isn't about balance or self care; it's a tactical manual for men who refuse to be sidelined. 1. Replace weakness with unshakable discipline using stoic drills and operant conditioning. 2. Turn time into a weaponized asset. 1% daily gains compound into total dominance. 3. Neutralize toxic influences, psychopaths, manipulators, gynocratic traps with cold rationality. 4. Forge mental toughness through primal physical rituals, lifting, cold exposure, strategic rest. 5. Architect a legacy plan that outlives you, rooted in biblical wisdom and Jungian self integration. 6. Master financial megatrends and avoid state mandated traps, e.g. marriage contracts, sloth based debt. 7. Leverage Maslow's hierarchy to bypass self actualization platitudes, ascend through raw merit. 8. Transform failure into fuel using Seligman's anti helplessness protocols and Duckworth's grit calculus. If you want to seize control, silence critics, and sculpt a life that echoes through generations, buy this book today. Weakness dies here.
