observation periods two tweet datasets were collected from other academics and third one was crawled from the Twitter API this process made use of the crawling tool cURL and the database software mongoDB The combined tweet dataset contained about 1 9 million tweets out of which a sample of 1945 tweets was drawn This sample was then evaluated in a quantitative content analysis according to a coding manual These codes were entered into the statistical analysis software SPSS in which they were also processed This study found that in the context of these uprisings Twitter was indeed used more as an information sharing tool and only to a relatively small fraction for organisational purposes This result does not negate the possibility of a mobilising effect of that small fraction A further central result is that almost every second tweet contained a hyperlink and that most of these lead to visual stimuli *Brandweek* ,2008 [Buy Shoes on Wednesday and Tweet at 4:00](#) Mark Di Vincenzo,2012-09-11 Buy Shoes on Wednesday and Tweet at 4 00 former investigative journalist Mark Di Vincenzo s follow up to his bestselling Buy Ketchup in May and Fly at Noon is another endlessly fascinating and eminently useful compendium of expert tips on perfect timing for a myriad of activities more of the best times to buy this do that and go there Covering an even wider range of topics than before including beauty tips pets cars and children this book is an absolute must for readers of Schott s Miscellany and other collections of useful information and for multi taskers searching for better healthier thrifter ways to do things After all timing is everything *Business Week* ,2010 **Cyber Public Sphere and Social Movements** Sami Çöteli,2018 The diversification and politicisation of the mass media within itself and also societal pressure created by the mass media at a social level have caused changes to our social structure The first change began with the contextual changes to the mass media and this change led to visible changes in societies That transformation has almost erased the distinction between the private and the public spheres especially as social media has entered our lives Now things that occur in the private sphere are easily transported into the public sphere and others private spheres Therefore the virtual public sphere has emerged through social media and all other practices on the internet It appears that activist movements have either been founded in the cyberworld or that existing activist movements have been strengthened by finding supporters via social media and blogs The public sphere and activist movements that come into existence in the virtual environment such as social media are a new experience in terms of societies and they are the sign of how the future will be shaped It is obvious that social media is now an integral part of our daily lives It is a place where political and secular ideas spread In this social area each individual has the opportunity to make political statements as if they were standing in an agora Shared content represents the position within the virtual life that individuals have built for themselves This study defines the virtual public sphere together with virtual activism and the network society in the light of the public sphere private sphere debates *The Wall Street Journal* ,2009 **Online safety** Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee,2014-03-19 The Culture Media and Sport Committee s inquiry has focused on three disparate aspects of online content and behaviour all of which are of widespread concern illegal content especially
