Proceedings of ELM2019 Jiuwen Cao, Chi Man Vong, Yoan Miche, Amaury Lendasse, 2020-09-11 This book contains some selected papers from the International Conference on Extreme Learning Machine 2019 which was held in Yangzhou China December 14-16 2019. Extreme Learning Machines (ELMs) aim to enable pervasive learning and pervasive intelligence. As advocated by ELM theories, it is exciting to see the convergence of machine learning and biological learning from the long-term point of view. ELM may be one of the fundamental learning particles filling the gaps between machine learning and biological learning, of which activation functions are even unknown. ELM represents a suite of machine and biological learning techniques in which hidden neurons need not be tuned, inherited from their ancestors, or randomly generated. ELM learning theories show that effective learning algorithms can be derived based on randomly generated hidden neurons: biological neurons, artificial neurons, wavelets, Fourier series, etc., as long as they are nonlinear, piecewise continuous, independent of training data, and application environments. Increasingly, evidence from neuroscience suggests that similar principles apply in biological learning systems. ELM theories and algorithms argue that random hidden neurons capture an essential aspect of biological learning mechanisms, as well as the intuitive sense that the efficiency of biological learning need not rely on the computing power of neurons. ELM theories thus hint at possible reasons why the brain is more intelligent and effective than current computers. The main theme of ELM2019 is Hierarchical ELM AI for IoT Synergy of Machine Learning and Biological Learning. This conference provides a forum for academics, researchers, and engineers to share and exchange R&D experience on both theoretical studies and practical applications of the ELM technique and brain learning. This book covers theories, algorithms, and applications of ELM. It gives readers a glance of the most recent advances of ELM. *EBOOK: Using Information Technology Complete Edition* Brian Williams, 2012-03-16 *EBOOK: Using Information Technology Complete Edition* **Generative AI** Martin Musiol, 2024-01-08 An engaging and essential discussion of generative artificial intelligence.
