shipboard engineering in nearly twenty years this useful reference offers a guiding philosophy to new experienced and
prospective engineers Focusing on the art of the engineer rather than the doctrine and regulations that govern the technical
side of the billet it helps them be more effective at their jobs Assuming that readers already possess basic knowledge of
engineering principles and practices the author sets forth a coherent blueprint to achieve and maintain the level of readiness
necessary to support sustained operations at sea This guide provides insights born of the diverse and hard won deckplate
experience of former engineer officers aboard a variety of ships and submarines The author and contributors who have
served in a number of engineering positions both at sea and ashore include a former commander of a destroyer readiness
squadron a former commanding officer of a nuclear powered attack submarine and three officers currently commanding
conventional gas turbine or diesel powered surface ships Acknowledging that the always demanding duties and
responsibilities of the fleet's engineer officers have become even more challenging in recent years as funds for maintenance
and training decrease they emphasize the need for shipboard engineers not only to master technical knowledge but to lead
manage and optimize the use of the personnel and material assets available to them Their collective wisdom will help flatten
the seemingly overwhelming learning curve that engineers must climb From taking over the department through overhaul to
the various evolutions and assessment processes that confirm readiness to deploy to faraway regions of the world this book
guides the reader through all the challenges that the engineer officer will encounter striking a balance between current fleet
conventions and engineering practices that have stood the test of time Navy Coast Guard and Merchant Marine engineering
officers and Navy surface and submarine warfare officers will all benefit from heeding its advice which until now could only
be learned through experience *Government Reports Announcements & Index*,1980 *Government Reports Annual*
