NEAR-MISS REPORTING

WHAT'S A NEAR MISS?

OSHA defines a near miss as a potential hazard or incident in which there was no property damage or injury, but where damage or injury easily could have occurred.

WHAT'S REQUIRED?

OSHA doesnt require employers to investigate near misses, but it says they should follow a similar investigative process to help correct hazards before injuries and illnesses occur.

WHAT TO REPORT?

A sample OSHA near-miss reporting policy requires workers to report all workplace incidents, hazardous conditions, near misses, and property and environmental damage to their immediate supervisor as soon as possible.

WHAT TO DO?

The policy says all near-miss incidents will be reviewed by company management to identify the root cause and the weaknesses in the system contributing to the incident.

The sample policy says near-miss reporting is encouraged/required and workers will not be subject to progressive disciplinary measures unless their behavior coincides with one of the following: Willful breach of safety policies, acts of gross negligence, acts of gross misconduct, repeated unreported violations, malicious activities, and workplace violence.
