Bernard*

Carlson,2015-04-27 The gold standard for Tesla biography Science Superb Nature The definitive account of Tesla s life and work Nikola Tesla was a major contributor to the electrical revolution that transformed daily life at the turn of the twentieth century His inventions patents and theoretical work formed the basis of modern AC electricity and contributed to the development of radio and television Like his competitor Thomas Edison Tesla was one of America s first celebrity scientists enjoying the company of New York high society and dazzling the likes of Mark Twain with his electrical demonstrations An astute self promoter and gifted showman he cultivated a public image of the eccentric genius Even at the end of his life when he was living in poverty Tesla still attracted reporters to his annual birthday interview regaling them with claims that he had invented a particle beam weapon capable of bringing down enemy aircraft Plenty of biographies glamorize Tesla and his eccentricities but until now none has carefully examined what how and why he invented In this groundbreaking book W

Bernard Carlson demystifies the legendary inventor placing him within the cultural and technological context of his time and focusing on his inventions themselves as well as the creation and maintenance of his celebrity. Drawing on original documents from Tesla's private and public life, Carlson shows how he was an idealist inventor who sought the perfect experimental realization of a great idea or principle and who skillfully sold his inventions to the public through mythmaking and illusion. This major biography sheds new light on Tesla's visionary approach to invention and the business strategies behind his most important technological breakthroughs.

Resisting Corporate Corruption Stephen V. Arbogast, 2022-11-16

Resisting Corporate Corruption The frequently used textbook is now in its 4th edition and includes new case studies on Tesla, VW, Nikola, WeWork, and Theranos. *Resisting Corporate Corruption* teaches business ethics in a manner very different from the philosophical and legal frameworks that dominate graduate schools. The book offers twenty-seven case studies and eight essays that cover a full range of business practices, controls, and ethics issues. The essays discuss the nature of sound financial controls, root causes of the Financial Crisis, contemporary ethics challenges like Fake It Till You Make It, and the evolving nature of whistleblower protections. The cases are framed to instruct students in early identification of ethics problems and how to work such issues within corporate organizations. They also provide would-be whistleblowers with instruction on the challenges they'd face plus information on the legal protections and outside supports available should they embark on that course. Some of the cases illustrate how The Young are the Most Vulnerable, i.e., short-service employees are most at risk of being sacrificed by an unethical firm. Other cases show the ethical dilemmas facing well-known CEOs and the alternatives they can employ to better combine ethical conduct and sound business strategy. Through these case studies, students should emerge with a practical toolkit that will help them to follow their moral compass. Finally, the cases provide an in-depth look at how a corporation becomes progressively corrupted: Enron, how the Financial Crisis was rooted in ethical decay at institutions as diverse as Countrywide, Goldman Sachs, Citigroup, and Moody's, and at the ethical challenges that have emerged in the post-crisis, post-Dodd-Frank environment at firms like TESLA, VW, Theranos, and WeWork.

Audience This text provides practical case study work for business and law students and employees in the formative stages of their careers. It is intended to help prepare this audience to withstand pressures and adverse cultural influences as they progress along a career path.

User Experience Design Satyam Kantamneni, 2022-05-03

Igniting business growth through UX In an increasingly digital world, users are rewarding products and services that provide them with a good experience and punishing those that don't with their wallets. Organizations realize they need to adapt quickly but don't know how or where to start.
