Professional Transitions in Nursing Alister Hodge, Wayne Varndell, 2020-07-25 Written by clinical lecturers Professional Transitions in Nursing provides a practical and accessible guide to the core knowledge and skills required by nurse graduates entering the Australian workforce for the first time Part I focuses on the structure of the Australian

healthcare system and the national competency standards. The authors examine key issues including ethics law and codes of conduct as well as the leadership, team building and communication skills necessary in a constantly changing and high pressure environment. Part II outlines the clinical skills and practices a nurse graduate must master including clinical assessment, risk management and reporting, management plans, diagnostics, reasoning, collaboration with other health professionals and working with patients from diverse backgrounds. A special feature is an analysis of issues in Aboriginal and Torres Strait Islander nursing practice. The authors also outline health information systems and technologies and how to utilise these most effectively. Part III looks at career planning and lifelong learning with advice on applying for a nursing position and continual professional development. This is an essential reference for both nursing graduates and overseas qualified nurses seeking to pursue a career in Australia. This text will be of tremendous use to new graduate nurses, nurses relocating from overseas and those of us who support these nurses during their transitions. The language is easily accessible and important content about everyday nursing practice is discussed in a practical and logical way. A particular strength is the use of research to support key points of discussion. Professor Andrea Marshall, Professor of Acute and Complex Care Nursing, Griffith University.
