Marketing Tricks Sybex Books, 2025-06-22 You don't need to trick people into buying. You just need to build something they already want. Build Products That People Beg To Buy is a game-changing roadmap for creating digital products, courses, and offers based on real, validated demand, not assumptions, trends, or hope. Inside this book, you'll learn how to identify profitable problems your audience is eager to solve, how to position your offer as the no-brainer solution, and how to test your ideas before you build anything. You'll also explore the psychology behind buyer decisions: why people say yes instantly, what makes them hesitate, and how to structure your product so it practically sells itself. Forget the exhausting launch cycle and the anxiety of "Will this flop?" Instead, you'll create offers so useful, clear, and compelling that people chase you for access. You'll also learn how to gather feedback that matters, refine without overbuilding, and build anticipation long before your product even drops. Whether you're launching your first digital product or revamping an old one, this book will help you shift from forced persuasion to natural demand. Because when your offer is aligned with real needs and positioned with clarity, you don't have to pressure people into buying. You simply invite them to say yes to something they already crave. It's time to stop pushing. It's time to build what people beg for.

Productive Tensions Christopher B. Bingham, Rory M. McDonald, 2023-11-07 How leaders can recast innovation's toughest trade-offs: efficiency vs. flexibility, consistency vs. change, product vs. purpose, as productive tensions. Why is leading innovation in today's dynamic business environment so distressingly hit or miss? More than 90 percent of high-potential ventures don't reach their projected targets. Surveys show that 80 percent of executives consider innovation crucial to their growth strategy, but only 6 percent are satisfied with their innovation performance. Should leaders aim for Steve Jobs-level genius, shower their projects with resources, or lean in to luck and embrace uncertainty? None of the above, say Christopher Bingham and Rory McDonald. Drawing on cutting-edge research and probing interviews with hundreds of leaders across three continents, in *Productive Tensions*, Bingham and McDonald find that the most effective leaders and successful innovators embrace the tensions that arise from competing aims: efficiency or flexibility, consistency or change, product or purpose. Bingham and McDonald spotlight eight critical tensions that every innovator must master, and they spell out, with dozens of detailed examples of both success and failure, how to navigate them. How do you excite customers about a product they've never imagined? When is it wise to accept what the data is telling you, and when should you ignore the data and plow forward anyway? How can you maintain stakeholders' trust and support during radical, unforeseen course corrections? Bingham and McDonald guide readers through innovation's thorniest tensions using examples drawn from the experience of organizations as varied as P&G, Instagram, the US military, Honda, In-N-Out Burger, Slack, Under Armour, and the snowboarding company Burton.

Market Entry Strategy in Germany** Andreas Kauerhof, 2017-03-01 Seminar paper from the year 2016 in the subject Business economics Business Management Corporate Governance grade 1.3 University of applied sciences Munich language English abstract The author of this assignment

reviews the Tesla's business model approach and its strategy in the non-domestic German market. Tesla's firm-specific advantages are especially related to innovation of the vehicle, the battery, and the infrastructure. Tesla Motors follows a product strategy entering from premium market and moving towards mass market. After starting with a high-price Roadster model, Tesla launched the more affordable Sedan and a SUV model. In 2017, Tesla plans to launch its first mass-market EV. Tesla shows a new value chain in the automotive industry by a deep vertical integration from EVs manufacturing towards software, recharging network, and battery manufacturing. Tesla entered the German market to export premium EVs. The Automaker also builds a charging network in Germany and prepares the market for its future mass production Model 3 coming in 2017. This work consists of three major parts. The first part deals with the theoretical background of international strategies for MNEs. The second part describes Tesla as a company and its strategy. The last part analyzes the competitive advantages of Tesla and shows how they are used to enter the German market. This work ends with a final reflection and a conclusion of the research.
