Cycling Pathways Henk-Jan Dekker, 2025-10-01 In an effort to fight climate change many cities try to boost their cycling levels They often look towards the Dutch for guidance However historians have only begun to uncover how and why the Netherlands became the premier cycling country of the world Why were Dutch cyclists so successful in their fight for a place on the road

Cycling Pathways The Politics and Governance of Dutch Cycling Infrastructure 1920 2020 explores the long political struggle that culminated in today's high cycling levels Delving into the archives it uncovers the important role of social movements and shows in detail how these interacted with national provincial and urban engineers and policymakers to govern the distribution of road space and construction of cycling infrastructure It discusses a wide range of topics ranging from activists to engineering committees from urban commuters to recreational cyclists and from the early 1900s to today in order to uncover the long and all but forgotten history of Dutch cycling governance

Real Estate and Sustainable Crisis Management in Urban Environments Saija Toivonen, Sirkka Heinonen, Ira Verma, Raúl Castaño-Rosa, Sara Wilkinson, 2024-05-31 The aim of this book is to promote the dynamic resilience of societies by identifying analysing and exemplifying the role of space and land use in both anticipated and unanticipated primary and secondary crisis situations The book brings together the expertise of a unique team of researchers and methods from fields of futures studies land use planning social sustainability and wellbeing architecture spatial planning design and real estate economics and presents a novel understanding of the direct and indirect impacts of possible crises in the space and land use context It goes on to discuss the concept of resilience and exemplifies potential solutions and offers a holistic and forward looking approach for crisis management through a lens of social sustainability and wellbeing making an important contribution to the promotion of wellbeing in the built environment especially in terms of land and residential space and building use This book does not only

identify barriers and successful incentives in resilient crisis management but also discusses the role of different stakeholders e.g. households, office workers, real estate owners, space occupants, firms, the public sector, etc. in crisis management. Finally, international case studies aiming to tackle the challenging landscape of future threats are presented along with novel tools to support the development of future policies, regulations, and management practices in the built environment which can increase the dynamic resilience of societies. Overall, this book is essential reading for decision makers in the public and private sectors, urban developers, space and spatial designers, architects, planners, community stakeholders, real estate investors, facility managers, and crisis and corporate responsibility managers. Selected peer-reviewed papers from the 4th International Conference on Intelligent Structure and Vibration Control ISVC 2014, July 25-28, 2014, Chongqing, China. *International Encyclopedia of Transportation*, 2021-05-13. In an increasingly globalised world, despite reductions in costs and time, transportation has become even more important as a facilitator of economic and human interaction. This is reflected in technical advances in transportation systems, increasing interest in how transportation interacts with society, and the need to provide novel approaches to understanding its impacts. This has become particularly acute with the impact that Covid-19 has had on transportation across the world at local, national, and international levels. Encyclopedia of Transportation, Seven Volume Set, containing almost 600 articles, brings a cross-cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering, operations, research, economics, geography, and sociology in order to understand the changes taking place. Emphasising the interaction between these different aspects of research, it offers new solutions to modern-day problems related to transportation. Each of its nine sections is based around familiar themes but brings together the views of experts from different disciplinary perspectives. Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines, different parts of the world, and different social perspectives. The nine sections are structured around the following themes: Transport Modes, Freight Transport and Logistics, Transport Safety and Security, Transport Economics, Traffic Management, Transport Modelling and Data Management, Transport Policy and Planning, Transport Psychology, Sustainability, and Health Issues in Transportation. Some articles provide a technical introduction to a topic, whilst others provide a bridge between topics or a more future-oriented view of new research areas or challenges. The end result is a reference work that offers researchers and practitioners new approaches, new ways of thinking, and novel solutions to problems. All encompassing and expertly authored, this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world. Provides a forward-looking and integrated approach to transportation. Updated with future technological impacts such as self-driving

vehicles cyber physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach including sets of comparative studies and applications

Community Carsharing and the Social-Ecological Mobility

Transition Luca Nitschke, 2022-07-14 This book investigates how practices of community carsharing are influencing everyday mobility It argues that hegemonic practices of automobility are reconfigured through practices of community carsharing thereby challenging capitalist mobilities in the realm of everyday life Through a detailed empirical study of practices of community carsharing and its practitioners in the rural regions around Munich Germany this book reveals how the practice contributes to the emergence of alternative automobile practices meanings identities and subjectivities It also explores the embedding of automobility into its ecological context the connection of function and community in practices of community carsharing and the changing of ownership relations through a process of commoning mobility This reconfiguration of everyday practices of automobility takes place through processes of everyday resistance re embedding and commoning and ultimately results in the emergence of an alternative mobility culture thereby facilitating the dissemination of an alternative common sense of community carsharing This book on community carsharing provides a valuable insight into carsharing in rural settings and exemplifies how carsharing specifically and sharing mobilities in general can contribute to a social ecological mobility transition The work will be of particular interest to scholars and practitioners working in mobility studies and mobilities
