**Surrealism and Ecology** Anne Marie Butler ,Donna Roberts,Iveta Slavkova,2026-01-06 Surrealism and Ecology is the first volume to consider the intersections of these two fields It addresses the contribution of the avant gardes in thinking about the relationship of humans with their environment in the context of massive environmental upheaval in the twentieth century This volume explores the significant role of Surrealist artists and writers within the history of critical thinking about nature and environment over the last hundred years It approaches ecology both as a mode of thinking about the many interconnections of life and as a way of experiencing and knowing the world The relationship of humans with their environment is of paramount significance within contemporary discourse and the contribution of the historical avant gardes to this topic remains largely underexplored In addressing this gap the book presents a diverse selection of analyses of the ways in which the Surrealists have thought about and represented nature and the human place within it It emphasises how Surrealism s interventions in connecting seemingly distinct domains of thought and phenomena can be understood as relevant to more recent developments in the practice of ecological thought Surrealist practices and the academic field of Surrealism studies are broad in scope and include not only visual art but also poetry and literature film philosophy exhibition design and experimental practice This volume includes contributions from established and developing scholars working across disciplines and locations who address such varied practices and engage with analyses from multiple perspectives The international and trans Atlantic history of Surrealism is well represented in this book with over half the texts exploring the work of European Surrealists in exile during the Second World War or the art and environmental and political activism of Surrealists in the Caribbean and throughout the Americas

Monumental cares Mechtild Widrich,2023-01-31 Monumental cares rethinks monument debates site specificity and art activism in light of problems that strike us as monumental or overwhelming such as war migration and the climate crisis The book shows how artists address these issues from Chicago and Berlin to Oslo Bucharest and Hong Kong in media ranging from marble and

glass to postcards graffiti and re enactment A multidirectional theory of site does justice to specific places but also to how far away audiences see them What emerges is a new ethics of care in public art combined with a passionate engagement with reality harking back to the realist aesthetics of the nineteenth century Familiar questions can be answered anew what to do with monuments particularly when they are the products of terror and require removal modification or recontextualisation And can art address the monumental concerns of our present      *Gaming Utopia* Claudia Costa Pederson,2021-04-06 In *Gaming Utopia Ludic Worlds in Art Design and Media* Claudia Costa Pederson analyzes modernist avant garde and contemporary video games to challenge the idea that gaming is an exclusively white heterosexual male corporatized leisure activity and reenvisions it as a catalyst for social change By looking at over fifty projects that together span a century and the world Pederson explores the capacity for sociopolitical commentary in virtual and digital realms and highlights contributions to the history of gaming by women queer and transnational artists The result is a critical tool for understanding video games as imaginative forms of living that offer alternatives to our current reality With an interdisciplinary approach *Gaming Utopia* emphasizes how game design creation and play can become political forms of social protest and examines the ways that games as art open doors to a more just and peaceful world      **alternative press index** ALTERNATIVE PRESS INDEX,2002
