Artificial Intelligence in Medicine Manda Raz,Tam C. Nguyen,Erwin Loh,2022-06-16 This book identifies Artificial Intelligence AI as a growing field that is being incorporated into many aspects of human life including healthcare practice and delivery The precision automation and potential of AI brings multiple benefits to the way disease is diagnosed investigated and treated Currently there is a lack of any appreciable understanding of AI and this book provides detailed understandings which include foundational concepts current applications future challenges amongst most healthcare practitioners The book is divided into four sections basic concepts current applications limitations and future directions Each section is comprised of chapters written by expert academics researchers and practitioners at the intersection between AI and medicine The purpose of the book is to promote AI literacy as an important component of modern medical practice This book is suited for all readers as it requires no previous knowledge it walks non technical clinicians through the complex ideas and concepts in an easy to understand manner International Conference on Artificial Intelligence for Smart Community Rosdiazli Ibrahim,K. Porkumaran,Ramani Kannan,Nursyarizal Mohd Nor,S. Prabakar,2022-11-13 This conference proceeding gather a selection of peer reviewed papers presented at the 1st International Conference on Artificial Intelligence for Smart Community AISC 2020 held as a virtual conference on 17 18 December 2020 with the theme Re imagining Artificial Intelligence AI for Smart Community to apply computational intelligence for biomedical instruments automation control and smart community to develop suitable solution for various real world application The conference virtually brought together researchers scientists engineers industrial professionals and students presenting important results in the related field of healthcare technology soft computing technologies IoT evolutionary computations automation and control smart manufacturing and smart cities Researchers and scientist working in the allied domain of Artificial Intelligence and others will find the book useful as it will contain some latest computational intelligence methodologies and applications Artificial Intelligence in Clinical Practice Chayakrit Krittanawong,2023-09-13 Artificial Intelligence in Clinical Practice How AI Technologies Impact Medical Research and Clinics compiles current research on Artificial Intelligence within medical subspecialties helping practitioners with diagnosis clinical decision making disease prediction prevention and the facilitation of precision medicine The book defines the basic concepts of big data and AI in medicine and highlights current applications challenges ethical issues and biases Each chapter discusses AI applied to a specific medical subspecialty including primary care preventive medicine general internal medicine radiology pathology infectious disease gastroenterology cardiology hematology oncology dermatology ophthalmology mental health neurology pulmonary critical care rheumatology surgery and OB GYN This is a valuable resource for clinicians students researchers and members of medical and biomedical fields who are interested in learning more about artificial intelligence technologies and their applications in medicine Provides the history and overview of the various modalities of AI and their applications within each field of medicine Discusses current AI

based medical research including landmark trials within each field of medicine Addresses the current knowledge gaps that clinicians commonly face that prevent the application of AI based research to clinical practice Encompasses examples of specific cases and discusses challenges and biases associated with AI Artificial Intelligence for Medicine Shai Ben-David, Giuseppe Curigliano, David Koff, Barbara Alicja Jereczek-Fossa, Davide La Torre, Gabriella Pravettoni, 2024-03-14

Artificial Intelligence for Medicine An Applied Reference for Methods and Applications introduces readers to the methodology and AI ML algorithms as well as cutting edge applications to medicine such as cancer precision medicine critical care personalized medicine telemedicine drug discovery molecular characterization and patient mental health Research in medicine and tailored clinical treatment are being quickly transformed by artificial intelligence AI and machine learning ML The content in this book is tailored to the reader s needs in terms of both type and fundamentals It covers the current ethical issues and potential developments in this field Artificial Intelligence for Medicine is beneficial for academics professionals in the IT industry educators students and anyone else involved in the use and development of AI in the medical field Covers the basic concepts of Artificial Intelligence and Machine Learning methods and practices and advanced topics and applications to clinical and precision medicine Presents readers with an understanding of how AI is revolutionizing medicine by demonstrating the applications of computational intelligence to the field along with an awareness of how AI can improve upon traditional medical structures Provides researchers practitioners and project stakeholders with a complete guide for applying AI techniques in their projects and solutions *Artificial Intelligence in Pathology* Chhavi Chauhan, Stanley Cohen, 2024-11-26

Artificial Intelligence in Pathology Principles and Applications provides a strong foundation of core artificial intelligence principles and their applications in the field of digital pathology This is a reference of current and emerging use of AI in digital pathology as well as the emerging utility of quantum artificial intelligence and neuromorphic computing in digital pathology It is a must have educational resource for lay public researchers academicians practitioners policymakers key administrators and vendors to stay current with the shifting landscapes within the emerging field of digital pathology It is also of use to workers in other diagnostic imaging areas such as radiology This resource covers various aspects of the use of AI in pathology including but not limited to the basic principles advanced applications challenges in the development deployment adoption and scalability of AI based models in pathology the innumerable benefits of applying and integrating AI in the practice of pathology ethical considerations for the safe adoption and deployment of AI in pathology Discusses the evolution of machine learning in the field to provide a foundational background Addresses challenges in the development deployment and regulation of AI in anatomic pathology Includes information on generative deep learning in digital pathology workflows Provides current tools and future perspectives *Intelligence-Based Cardiology and Cardiac Surgery* Anthony C. Chang, Alfonso Limon, Robert Brisk, Francisco Lopez- Jimenez, Louise Y Sun, 2023-09-06

Intelligence Based Cardiology and Cardiac Surgery Artificial Intelligence and Human Cognition in

Cardiovascular Medicine provides a comprehensive survey of artificial intelligence concepts and methodologies with real life applications in cardiovascular medicine Authored by a senior physician data scientist the book presents an intellectual and academic interface between the medical and data science domains The book s content consists of basic concepts of artificial intelligence and human cognition applications in cardiology and cardiac surgery This portfolio ranges from big data machine and deep learning cognitive computing and natural language processing in cardiac disease states such as heart failure hypertension and pediatric heart care The book narrows the knowledge and expertise chasm between the data scientists cardiologists and cardiac surgeons inspiring clinicians to embrace artificial intelligence methodologies educate data scientists about the medical ecosystem and create a transformational paradigm for healthcare and medicine Covers a wide range of relevant topics from real world data large language models and supervised machine learning to deep reinforcement and federated learning Presents artificial intelligence concepts and their applications in many areas in an easy to understand format accessible to clinicians and data scientists Discusses using artificial intelligence and related technologies with cardiology and cardiac surgery in a myriad of venues and situations Delineates the necessary elements for successfully implementing artificial intelligence in cardiovascular medicine for improved patient outcomes Presents the regulatory ethical legal and financial issues embedded in artificial intelligence applications in cardiology

Outbreak Oracles: How AI's Journey through COVID-19 Shapes Future Epidemic Strategy Dmytro Chumachenko,Jasleen Kaur,Jake Y.

Chen,2025-08-07 In the wake of the COVID 19 pandemic the convergence of Artificial Intelligence AI Big Data and in silico simulation has emerged as a cornerstone in pandemic surveillance and public health informatics The integration of these disciplines is creating powerful tools for real time data analysis predictive modelling and virtual simulations of disease dynamics It facilitated real time decision making optimized resource allocation and enhanced disease surveillance This transformative period witnessed AI s potential to reshape public health strategies emphasizing its significance in future epidemic preparedness The primary objective of this Research Topic is to collate groundbreaking research and critical reviews that highlight AI s contributions during the COVID 19 era and its implications for future epidemic strategies We aim to foster a comprehensive understanding of the pivotal AI driven methodologies in the pandemic response and how these innovations can be harnessed for future health crises By synthesizing lessons learned and charting the trajectory of AI and big data ecosystems in epidemic management this issue seeks to provide a roadmap for integrating AI more seamlessly into global health strategies ensuring that we are better equipped to tackle subsequent outbreaks with agility and precision This call for papers invites submissions that not only recognize the pivotal role of AI during the COVID 19 crisis but also expand on how AI when coupled with Big Data and in silico approaches can revolutionize our preparedness and response to future public health emergencies We are seeking groundbreaking research and insightful reviews that Demonstrate AI s role in synthesizing Big Data for pandemic forecasting and real time surveillance Illustrate the impact of AI driven simulations in

understanding and managing epidemic spread Detail the applications of AI in enhancing public health informatics and data driven decision making Showcase in silico modelling as a tool for strategic resource distribution and policy formulation Explore AI s capacity to integrate with Big Data for robust epidemiological monitoring Investigate the use of AI and Big Data to provide mental health support during health crises Examine how AI and Big Data can promote healthcare equity especially in underserved areas Address the ethical implications of employing AI and simulation in public health strategies Discuss the interplay between AI Big Data and in silico techniques in strengthening digital health innovations The areas of interest comprise but are not restricted to AI driven early warning mechanisms and risk evaluation AI and big data ecosystems in advancing public health analytics and research AI enhanced resource distribution and strategic decision making AI s role in epidemiological monitoring and epidemic control AI s application in crisis intervention and humanitarian assistance AI s contribution to mental well being and psychological aid during emergencies AI s potential to ensure health parity and healthcare accessibility in underserved regions The ethical legal and societal dimensions of AI s integration in global health and epidemic response The synergy of AI with other digital health innovations during health crises Our aim is to compile a comprehensive volume that not only emphasizes the technological prowess of AI but also its practical deployment in conjunction with Big Data and in silico methods to offer a more nuanced effective and equitable global health response We encourage contributions that provide not just theoretical frameworks but also empirical evidence of the benefits and challenges of these integrated approaches in public health domains
