Connect Lars Birkholm Petersen, Ron Person, Christopher Nash, 2014-09-05 Connect and engage across channels with the new customers Connect is the ultimate marketing guide to becoming more relevant effective and successful within the new marketplace Written by a team of marketing experts serving Fortune 500 brands this book outlines the massive paradigm shift currently taking place within the industry and provides the insight and perspective marketers need to stay on board Readers will find guidance toward reaching a customer base that sees marketers as an unnecessary annoyance and strategies for engaging those customers at touch points throughout the customer lifecycle The book's scope encompasses both digital and real life avenues discussing the new ways of thinking and the new tools and processes that allow marketers to function in the new era where digital customer experiences are increasingly important Marketing is undergoing a revolution to rival the impact of Gutenberg's printing press Customers are in control with more choice and more access than ever before and they refuse to be sold to or managed Many marketing professionals are flailing for a new strategy while the winners are clearly jumping ahead Connect takes readers inside the winners world to learn the approach that's engaging the new consumer Discover the technology and processes that allow marketers to remain relevant Craft a personal relevant and accessible customer journey that engages the connected customer Keep in touch throughout the customer's life cycle both online and offline Link digital goals and metrics to business objectives for a more relevant strategy Smart marketers have moved to a higher level that achieves business objectives while increasing relevance to the customer Connect provides readers a roadmap to this new approach and the tools that make it work Governance in "Cyberspace": Access and Public Interest in Global Communications Klaus Grewlich, 1999-11-09 Cyberspace is the emerging invisible intangible world of electronic information and processes stored at multiple interconnected sites The digital revolution leads to convergence of telecommunications computer Internet and broadcasting and to dynamic multimedia value chains Deregulation and competition are major driving forces in the new interactive electronic environment This volume contains normative proposals for cyber regulation including self regulation grounded on developments in the EU US and the Far East in international organisations WTO OECD WIPO ITU in business fora in NGOs in the Internet community and in academic research The multi actor government business civil society and multi level analysis subsidiarity pertains e.g. to ex ante and ex post access regulation competition network economics external effects essential facilities public interest principles human dignity free speech privacy security development and culture consumer protection cryptography domain names and copyright Lawyers regulators business executives investment bankers diplomats and civil society representatives need shared essentials of plurilateral governance to safeguard both competition and public interest objectives at a scale congruent to cyberspace in the transition to an international law of cooperation Terrorism and the Electric Power Delivery System National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on

Enhancing the Robustness and Resilience of Future Electrical Transmission and Distribution in the United States to Terrorist Attack,2012-11-25 The electric power delivery system that carries electricity from large central generators to customers could be severely damaged by a small number of well informed attackers The system is inherently vulnerable because transmission lines may span hundreds of miles and many key facilities are unguarded This vulnerability is exacerbated by the fact that the power grid most of which was originally designed to meet the needs of individual vertically integrated utilities is being used to move power between regions to support the needs of competitive markets for power generation Primarily because of ambiguities introduced as a result of recent restricting the of the industry and cost pressures from consumers and regulators investment to strengthen and upgrade the grid has lagged with the result that many parts of the bulk high voltage system are heavily stressed Electric systems are not designed to withstand or quickly recover from damage inflicted simultaneously on multiple components Such an attack could be carried out by knowledgeable attackers with little risk of detection or interdiction Further well planned and coordinated attacks by terrorists could leave the electric power system in a large region of the country at least partially disabled for a very long time Although there are many examples of terrorist and military attacks on power systems elsewhere in the world at the time of this study international terrorists have shown limited interest in attacking the U S power grid However that should not be a basis for complacency Because all parts of the economy as well as human health and welfare depend on electricity the results could be devastating Terrorism and the Electric Power Delivery System focuses on measures that could make the power delivery system less vulnerable to attacks restore power faster after an attack and make critical services less vulnerable while the delivery of conventional electric power has been disrupted **Online Access** ,1996 **The Art of Access** Heather Pressman,Danielle Schulz,2021-04-30

Gheorghe,2017-07-15 With the increased dependence on digital and internet technologies cyber security has come to be regarded as a national security issue and the number of countries with a published cyber security strategy continues to rise But these national cyber security strategies often run the risk of failing to address all the cyber security requirements of the

many institutions within a given country and the complex nature of the stakeholders involved and the networks formed by them means that the problem requires an interdisciplinary approach This book presents papers from the NATO Advanced Research Workshop ARW entitled A Framework for a Military Cyber Defense Strategy held in Norfolk Virginia USA in April 2016 The workshop focused on key priority areas for cyber defense along with NATO s cyber defense policy implementation and brought together experts with an eclectic mix of backgrounds and specialties from a group of NATO member states and partner countries The participants considered not only the technical implications of cyber security efforts but also the legal strategic educational and organizational aspects and the book reflects this wide view of the field and its intricacies highlighting the complexity of cyber security and the many challenges it presents This overview of cyber security offers state of the art approaches from a multidisciplinary standpoint and will be of interest to all those working in the field
