Cebula,Robert N. Fenili,James V. Koch,2025-10-30 College graduates do not benefit economically from the intercollegiate athletic programs of their alma mater Students provide substantial funding for their institution s

intercollegiate athletic programs via tuition and fees. In fact, a typical student is required to pay for such activities. Will this financial burden paid for during undergraduate years help them in the real world? Whether measuring the incomes earned by alumni, their upward economic mobility or their record in paying off federal student loans, there is no subsequent economic payoff to graduates of institutions that spend large sums of money on athletic programs. And in all actuality, evidence suggests that graduates of campuses with FBS big time football programs end up earning less than graduates of comparable non-FBS institutions. The statistical analysis provided in this book is derived from a sample of almost 700 four-year institutions between 2004 and 2022. The authors present the information and provide analysis focusing on five different measures of economic success the alumni for example the incomes alumni earn after graduating. The book uses this data to explain that there is either no definitive positive connection and in fact there might be a negative relationship between intercollegiate athletic programs and the economic success of their alumni.

*Cap in Hand* Bruce Dowbiggin, Ryan Gauthier, 2018-09-11. Iconic baseball writer Bill James in 1987 frustrated with MLB's labor stoppages and the decline of the minor leagues wrote that the minors were an abomination if you're selling a sport and the players don't care about winning that's not a sport. That's a fraud an exhibition masquerading as a contest. Bill imagined a better model and proposed that as opposed to limiting the number of teams in MLB to protect parity a free market was capable of sustaining many more franchises hundreds even if we would just allow it to sort out the level at which those cities might best compete. *Cap in Hand* goes a step further arguing that a free market in sports teams and athletes once existed and could work again if the monopolists of MLB, NFL, NBA, and NHL would simply relent from salary restraint schemes and reserve clause models that result in elite talent being spread as thinly as possible and mediocrity being rewarded via amateur drafts and equalization payments. In fact the model for this exists and may be the most wildly popular and monetarily successful of all professional sports European football. *Cap In Hand* asks what if the four major North American pro sports move beyond the restrictive covenants of the franchise model. The product sold to fans today is a pale copy of what it might be if the market could guide the best players to the best teams whose ingenuity and innovation would inspire everyone to do better and put on a better show.
