international centers This is a working textbook that covers the broad spectrum of intensive care medicine providing sufficient detail on each topic without the need to refer to large reference books Provides a new section on Shock with 5 new chapters Shock an overview Haemodynamic monitoring Monitoring Oxygenation Lactic Acidosis Multiple Organ Dysfunction Offers 13 new chapters Ethics in Intensive Care Common problems after ICU Clinical Information Systems Imaging the Chest Non Invasive Ventilation Abdominal Surgical Problems Pre existing Disease in Pregnancy Tropical Diseases Blast Injury Gun Shot Wounds Stabbing Biological Warfare Vasopressors Inotropes Vasodilators Paediatric Cardiopulmonary Resuscitation

*Anaesthesia and Intensive Care*, 1996      Care of the Critically Ill Patient Jack Tinker, Warren M. Zapol, 2012-12-06 Nine years have passed since the first edition of *Care of the Critically Ill Patient* was published As its editors Maurice Rapin and I were fortified by the many positive and helpful comments of reviewers and readers the work appeared to have fulfilled our original aims and objectives Intensive care medicine has of course advanced and changed in many ways since 1982 and it therefore seemed appropriate to consider the preparation of a second edition Encouraged by the reception of the first and the timely prompting of the publishers we began in 1986 to prepare for a new edition Caring for critically ill patients is of universal concern and we were therefore delighted when Warren Zapol joined us as Chief editor widening our international base The three of us subsequently spent many happy and productive times together planning the content priorities scale and contributions for the new edition A great tragedy then overcame us Maurice Rapin died suddenly His death deprived us of a true friend and colleague who had been an international pioneer during the development of intensive care medicine I will always remember with affection and professional pride the many hours he and I worked together in preparing the first edition of this book and also as founding editors of the now firmly established journal *Intensive Care Medicine* An obituary written by Warren Zapol that appeared in the journal follows the Preface      *Paediatric Surgery, Second edition* David M Burge, Mervyn D Griffiths, Henrik A Steinbrecher, Robert A Wheeler, 2005-11-25 The second edition of *Paediatric Surgery* has been designed to be highly relevant to the practice of clinical paediatric surgery With this in mind topics are presented in a clear and easily digestible format with the most important learning points in each area clearly identified The principles of the basic sciences and how these relate to competent clinical practice are covered in each clinical chapter and are an important part of the Intercollegiate Board examination and other higher examinations in paediatric surgery in Europe and Australasia While many of the topics from the previous edition have been retained and updated as appropriate there are a number of important additions The important and developing field of minimally invasive surgery has been given more prominence Oncology has been expanded to include more detail on solid tumours as well as more on central venous access and the surgical assessment of the acutely unwell child undergoing chemotherapy Thoracic surgery has been expanded to include the management of empyema and the open and endoscopic approach to resection and biopsy Finally important generic issues such as communication skills the critical analysis of journal articles and evidence based medicine have all been introduced

The second edition of Paediatric Surgery will be an invaluable resource for all trainee paediatric surgeons providing a summary of practical evidence based advice for the candidate for the Intercollegiate Board Speciality Examination in Paediatric Surgery FRCS Paeds or other equivalent examination without overwhelming and unnecessary detail
