## **Pawprints Of Katrina Pets Saved And Lessons Learned:**

*Pawprints of Katrina* Cathy Scott,2010-06-15 In the aftermath of Hurricane Katrina many animals had to fend for themselves because their owners lost them or were unable to care for them In Pawprints of Katrina Pets Saved and Lessons Learned Cathy Scott documents her experience working with the Best Friends Animal Society triage center to rescue lost animals and reunite them with their owners Over two hundred stories with accompanying photos describe dramatic and challenging rescue cases with details about the rescues the examinations treatment and follow up care by the selfless volunteers who worked to save beloved best friends

**Pawprints of Katrina** Cathy Scott,2008-06-16 Pawprints of Katrina includes nearly 200 heroic rescues heartwarming reunions and stories of selfless efforts of strangers brought together by a disaster in an effort to save animals at the Best Friends Animal Society *Disaster Relief* Hayley Mitchell Haugen,Bruce Elkins,2009-09-11 This collection of essays explores the issues surrounding disaster relief Readers are presented with a diversity of opinion on the topic including both conservative and liberal points of view in an even balance Readers will evaluate disaster relief systems and whether the government should be in charge of disaster relief They will examine the effectiveness of F E M A and whether it needs better operations management Has American disaster relief improved since Hurricane Katrina Does the U N s humanitarian relief efforts need oversight How do we make sure that pets are not forgotten during natural disasters These questions and more are answered through this collection of compelling articles

*Pet Politics* Susan Hunter,Richard A. Brisbin,2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society Pet Politics presents the first study of the development of companion animal or pet law and policy in Canada and the United States by political scientists The authors examine how people and governments classify three species of pets or companion animals cats dogs and horses for various degrees of legal protection They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty kennel licensing horse slaughter feral and roaming cat and breed ban policies Finally they examine the enforcement of these laws and policies by agencies and the courts Using an eclectic mix of original empirical data original case studies and interviews and relying on general theories and research about the policy process and the sociopolitical function of legality the authors illustrate that pet policy is a unique field of political struggle a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals The result of the political struggle the authors argue is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals *Animals and Ourselves* Kathy Merlock Jackson,Kathy Shepherd Stolley,Lisa Lyon Payne,2020-09-25 The relationship between humans and animals has always been strong symbiotic and complicated Animals real and fictional have been a mainstay in the arts and entertainment figuring

prominently in literature film television social media and live performances Increasingly though people are anthropomorphizing animals assigning them humanoid roles tasks and identities At the same time humans such as members of the furry culture or college mascots find pleasure in adopting animal identities and characteristics This book is the first of its kind to explore these growing phenomena across media The contributors to this collection represent various disciplines to include the arts humanities social sciences and healthcare Their essays demonstrate the various ways that human and animal lives are intertwined and constantly evolving

[Citizen Canine](#) David Grimm, 2014-04-08 Dogs are getting lawyers Cats are getting kidney transplants Could they one day be fellow citizens Cats and dogs were once wild animals Today they are family members and surrogate children A little over a century ago pets didn't warrant the meager legal status of property Now they have more rights and protections than any other animal in the country Some say they're even on the verge of becoming legal persons How did we get here and what happens next In this fascinating exploration of the changing status of dogs and cats in society pet lover and award winning journalist David Grimm explores the rich and surprising history of our favorite companion animals He treks the long and often torturous path from their wild origins to their dark days in the middle ages to their current standing as the most valued animals on Earth As he travels across the country riding along with Los Angeles detectives as they investigate animal cruelty cases touring the devastation of New Orleans in search of the orphaned pets of Hurricane Katrina and coming face to face with wolves and feral cats Grimm reveals the changing social attitudes that have turned pets into family members and the remarkable laws and court cases that have elevated them to quasi citizens The journey to citizenship isn't a smooth one however As Grimm finds there's plenty of opposition to the rising status of cats and dogs From scientists and farmers worried that our affection for pets could spill over to livestock and lab rats to philosophers who say the only way to save society is to wipe cats and dogs from the face of the earth the battle lines are being drawn We are entering a new age of pets one that is fundamentally transforming our relationship with these animals and reshaping the very fabric of society For pet lovers or anyone interested in how we decide who gets to be a person in today's world [Citizen Canine](#) is a must read It is a pet book like no other

[Focus On: 100 Most Popular American Autobiographers](#) Wikipedia contributors, [Animal Places](#) Jacob Bull, Tora Holmberg, Cecilia Åsberg, 2017-11-22 Nonhuman animals are ubiquitous to our human societies Interdisciplinary human animal research has for 50 years drawn attention to how animals are ever present in what we think of as human spaces and cultures Our societies are built with animals and through all kinds of multispecies interactions From public spaces and laboratories to homes farms and in the wilderness human and nonhuman animals meet to make space and place together through webs of power relations However the very spaces of these interactions are not mute or passive themselves The spaces where species meet matter and shape human animal relations This book takes as its starting point the relationship between place and human animal interaction It brings together the work of leading scholars in human animal studies from a variety of disciplinary and interdisciplinary backgrounds With a distinct

focus on place physical space and biocultural geography the authors of this volume consider the ways in which space human and nonhuman animals co constitute each other how they make spaces together produce meaning around them struggle over access how these places are storied and how stories of spaces matter Presenting studies thematically and including a variety of nonhuman creatures in a range of settings this book delivers new understandings of the importance of nonhuman animals to understandings of place and the role of places in shaping our interactions with nonhuman creatures As pets as laboratory animals as exhibits as parasites as livestock as quarry as victims of disaster or objects of folklore this book offers insights into human animal intermingling at locales and settings of great relevance to many areas of research including geography sociology science and technology studies gender studies history and anthropology This book meets the evolving interest in human animal interaction anthrozoology and the environmental humanities in relation to the research on space and place that currently informs the humanities and the social sciences

**The British National Bibliography** Arthur James Wells,2009 **Rescued - Saving Animals from Disaster** Allen Anderson,Linda C. Anderson,2006 The inspiration for Rescued was the tragic situation with pets during the Katrina disaster thousands refusing to leave without their pets and many animals dying due to official indifference The authors interviewed hundreds of volunteers hurricane survivors and government officials They offer both hope and practical suggestions as well as the latest information on official policy and how to help in future catastrophes

**The Dogs Who Found Me** Ken Foster,2016-08-01 Now regarded as a classic in dog literature Ken Foster s memoir chronicles his journey from first time dog owner to rescuer and all the lessons and mistakes he made along the way Bookended by the tragedies of 9 11 and Katrina Foster finds that dogs open his eyes to the benefits of compassion selflessness and the chaotic beauty of living each day in the moment But more than Foster s own story readers remember the dogs Among them are Duque a Costa Rican stray Brando Foster s first adopted dog and a supposed pit bull mix who outgrew his Manhattan studio apartment Rocco a clownish red pit bull whose owner mistakenly gives him away to the wrong person Zephyr a cheerful Rottweiler mix who awakens Foster by sitting on his chest when his heart stops working and Sula the tiny lost pit bull who showed up at Foster s door one day and stayed Whether bearing witness to national tragedy grieving the death of a friend or dealing with his own mortality Foster finds strength in his dogs and in the reciprocal nature of rescue
