Nuclear Energy and Liability in South Asia M. P. Ram Mohan, 2015-04-15 This book advocates pursuing a regional approach to nuclear risk framework which it argues is more promising in the current scenario than the non achievable global regime In the development of international legislation on liability the nuclear energy sector represents an alternative approach to a transboundary liability regime Building on this foundation and following the Chernobyl accident international consensus was sought for a stronger transboundary legal regime in the event of a nuclear disaster However after sixty years of the existence of international nuclear liability laws and twenty five years after Chernobyl the primary objectives of the Conventions harmonization and a global regime remain unfulfilled Further many countries are now creating or expanding nuclear programs without adequate transboundary legal protection In light of these issues a regional approach is an option that cannot be ignored Given its rapidly expanding nuclear energy footprint South Asia is in a unique position to adopt a regional mechanism The methodology adopted for the study in the book combines a literature review of international law on nuclear liability with an analysis of South Asian nuclear energy programs and their international and national legal obligations A technical risk assessment study conducted to identify the level of transboundary nuclear risk within South Asia is also presented This is followed by interviews with experts and policymakers to gauge the willingness of the South Asian Association for Regional Cooperation SAARC community to respond to this shared regional concern **Research EU.**, 2014-02 **Directory of Little Magazines and Small Presses** Len Fulton, 2008 PC Magazine , 2005 *Making Sense*
