End Of Online Shopping, The: The Future Of New Retail In An Always Connected World Wijnand Jongen, 2018-07-19
Retail is going through difficult times and is suffering the consequences of both the economic crisis and the digitization of society. Fundamentally, there is a bigger problem: stores cannot keep up with the changing behavior of customers who are connected 24/7. Customers for whom there is no distinction between online and offline. The End of Online Shopping: The Future of New Retail in an Always Connected World describes how the smart sharing, the circular, and the platform economy are shaping a new era of always connected retail. Retailers urgently need to innovate if they want to stay relevant in a world dominated by marketplaces and sharing platforms. The book contains inspiring examples from different industries which include the usual suspects such as Amazon, Alibaba, and Google, but also local startups, and covers all aspects of the customer journey from orientation and selection to delivery. The End of Online Shopping provides an excellent overview of shopping trends and developments worldwide and offers readers indispensable insights into the future of retail. Modern Approaches for Intelligent Information and Database Systems Andrzej Sieminski, Adrianna Kozierkiewicz, Manuel Nunez, Quang Thuy Ha, 2018-02-23. This book offers a unique blend of reports on both theoretical models and their applications in the area of Intelligent Information and Database Systems. The reports cover a broad range of research topics including advanced learning techniques, knowledge engineering, Natural Language Processing (NLP), decision support systems, Internet of things (IoT), computer vision, and tools and techniques for Intelligent Information Systems. They are extended versions of papers presented at the ACIIDS 2018 conference, 10th Asian Conference on Intelligent Information and Database Systems, which was held in Dong Hoi City, Vietnam, on 19-21 March 2018. What all researchers and students of computer science need is a state-of-the-art report on the latest trends in their respective areas of interest. Over the years, researchers have proposed increasingly complex theoretical models which provide the theoretical basis for numerous applications. The applications in turn have a profound influence on virtually every aspect of human activities while also allowing us to validate the underlying theoretical concepts. **House Beautiful**, 1991 **Digital Business and E-commerce Management** Dave Chaffey, David Edmundson-Bird, Tanya Hemphill, 2019.
