Transforming Business Through Digital Sustainability Models Younas, Afshan, Kassim, Aza Azlina Md., 2025-05-08 Sustainability and digitalization are becoming essential in businesses. It is necessary to enhance collaboration between the digitalization of business and sustainability. Global business practices that focus on sustainability through the digital transformation process can stay competitive and socially responsible. As a result, there is a need and growing demand for resources that help businesses identify the complexities of digital business transformation while achieving sustainable practices. *Transforming Business Through Digital Sustainability Models* explores sustainability through digitalization practices, identifies problems, and explores innovative solutions. It has educational and professional values that provide practical insights and strategies for achieving sustainability through the digitalization of businesses. Covering topics such as stakeholder engagement, cost savings, and ecosystem restoration, this book is an excellent resource for business leaders, sustainability activists, policymakers, researchers, academicians, and more.

*Mergers, Acquisitions, and Other Restructuring Activities* Donald DePamphilis, 2021-09-26 *Mergers, Acquisitions, and Other Restructuring Activities: An Integrated Approach to Process, Tools, Cases, and Solutions*, Eleventh Edition, presents the most current and comprehensive M&A information available. Organized according to the context in which topics normally occur in the M&A process, the book covers M&A environments, M&A processes, M&A valuation and modeling, deal structuring and financing strategies, and alternative business and restructuring strategies. Covering industries worldwide, this new edition illustrates the most germane strategies and tactics in today's marketplace. It includes substantially more ancillary materials than previous editions, including an extensive test bank, chapter summaries, and instructor and student PowerPoint slides. More than 100 new references to relevant academic research published since 2018 make the 11th edition a balanced, comprehensive guide to the complex and dynamically changing world of M&A. Provides a rigorous discussion on the strengths and limitations of financial modeling as applied to M&A. Includes more than 270 empirical studies published in leading peer-reviewed journals published 2018-2020, all new since the 10th edition (2019). Presents updated M&A tactics and strategies as well as court cases and new regulations governing business combinations, valuation methodologies, and financing.

Sustainability Objectives in Competition and Intellectual Property Law Pranvera Këllezi, Pierre Kobel, Bruce Kilpatrick, 2024-01-13 This open access volume of LIDC contributions focuses on how competition and intellectual property laws incorporate sustainability objectives. Businesses are increasingly embracing sustainability objectives driven by the international community. Although competition and intellectual property law are certainly not the only tools for addressing sustainability issues, they can play a role in moving toward a more sustainable society. Sustainability has gained prominence in competition law in all jurisdictions covered in this volume. The contributions focus on classic questions such as whether sustainability agreements restrict competition and, if so, to what extent businesses can be exempted on efficiency grounds. The papers also raise a number of questions in particular

concerning the treatment of non market efficiencies The soft law and case law produced by competition authorities are examined and the leadership role of some competition authorities in the field from advocacy to policy papers and sustainability guidelines is highlighted The authors call for more individual guidance to provide enhanced transparency and clarity to industry advisors and society at large on sustainability issues with guidelines or sustainability related block exemptions providing even greater legal certainty With regard to intellectual property the contributions examine various important issues such as the need for intellectual property rights to remain technology neutral ways to promote the use of sustainable technologies and incentives for licensing and ways to promote the dissemination of sustainable technologies including compulsory licensing cross licensing open source or FRAND licensing and replacing the destruction of counterfeit goods with recycling The papers also discuss greenwashing and how it can be addressed through revisions to trademarks and related rights
