Land Use Dynamics and Governance in Sungai Selangor Watershed Jamilah Mohamad, Goh Hong Ching, 2015-11-24

Watersheds have been widely recognized as the best scale at which to govern water. At the geographic scale of the watersheds, stakeholders are able to make decisions on how to manage water resources in a setting more conducive to participation. Through coordinated development and management of water, land and related resources, economic and social welfare can be optimized without compromising sustainability of vital environmental systems. Sungai Selangor is an important water resource for the state of Selangor. It is the major contributor in meeting water demand to the Selangor State and Kuala Lumpur. Since early days, Sungai Selangor has played a central role in the development of settlements in northern Selangor. The research described here is an attempt to understand the development forces operating in the Sungai Selangor watershed. The approach taken is intentionally multi-disciplinary as it attempts to paint a broad brush picture of the current situation within the Sungai Selangor watershed. Increasing pressures on land development is a major factor that causes land use conflicts in the watershed. Spatial environmental governance should improve collaboration and connections between citizens and decision makers at the watershed scale. Many issues within the economic, social or environmental realm necessitate an understanding of the spatial context within which such forces operate. The book is organized in ten chapters, each chapter being devoted towards addressing particular issues considered prevalent or outstanding within the community living within the watershed. Although the book has been written in an academic manner, it should also appeal to the general public and students in higher education institutions as it relates to topical issues. Beginner researchers may find that the discussion of various issues within a location specific context might spark off their interest to begin their own research on particular aspects that appeal to their own area of expertise.

**The Hubris Hazard, and How to Avoid It** Eugene Sadler-Smith, 2024-03-15

Hubris is something we've all seen in action and experienced all too often. It's a significant occupational hazard and a serious potential derailment factor for leaders, organisations and civil society. Hubristic leaders, intoxicated as they are with power, praise and success, behave in ways that, if left unchecked, invite unintended and unforeseen negative consequences which impact destructively on individuals, industries, economies and nations. Despite

numerous examples throughout history of hubris destructive consequences it nonetheless appears to be an ever present and growing danger Many leaders seem to be blind to the hazards of hubris and oblivious to the lessons of history Prevention is better than cure and understanding the nature of the hubris hazard and the associated risk factors will help leaders and managers improve their personal performance and avoid derailment and even more importantly protect the well being of employees and the resilience of their organisations over the long term This book explains the characteristics causes and consequences of hubris and shows how to combat the significant hazard it poses to managers leaders organisations and society With contemporary examples each chapter explores a particular hubris risk factor and shows how the risk can be managed and mitigated and exposure to the hubris hazard minimised The Hubris Hazard and How to Avoid It offers practical guidance and action points for managers and leaders on how to recognise hubris in themselves and others and what to do to combat it when it arises It will also be useful for business and executive coaches and leadership trainers and developers
