

Intermittent Fasting

Stage 1: Right After Eating

- Carbohydrates from food are converted into glucose (sugar) and released into the bloodstream.
- Blood sugar level rises.
- Insulin stimulates the conversion of glucose into glycogen as energy storage.

Stage 2: 3 Hours After Eating

- While insulin works, blood sugar level drops.
- In a non-fasting state, glycogen is used as energy.
- Excess glycogen that is not used is stored in the body as fats.

Stage 3: 9 Hours After Eating

- As blood sugar levels continue to drop, the body reacts by converting glycogen back into glucose and releasing it into the bloodstream.
- Fat is not yet used as an energy source, as there is still glucose and glycogen available.

Stage 4: 11 Hours After Eating

- Now that the stored glycogen has been almost used up, a metabolic switch is flipped.
- Fat is burned as it is used as energy.

Stage 5: 14-16 Hours After Eating

- As fat-burning continues, fatty acids are converted into ketones via ketosis.
- Ketones provide energy to the brain, heart and other vital organs.

weight loss isn't easy. If it was, everyone would be doing it, but you're here taking action while others are not, and one step closer to that dream body. Intermittent fasting is one of the best eating plans that you can go on, and notice that we say eating plan rather than diet plan. Rather than focusing on diet plans with eating that restrict the foods you want, intermittent fasting is simply going to ask you to limit your eating window. Instead of eating from the moment you get up until the moment you fall asleep, you will focus on eating at certain periods of time during the day or the week. This guidebook is going to delve deeper into intermittent fasting so you know exactly what to expect while you are on this fasting schedule. The good news is there is some freedom, and you can pick and choose the type of fast that gives you the best results or that seems to be the easiest for your busy schedule. Some of the topics that we will explore in this guidebook include: Why does intermittent fasting work so much better than other diet plans? What is the best way to break my fast to get the best results? What are the different types of intermittent fasts? Powerful motivation tips that keep you focused and stay on your fast. So what are you waiting for? Scroll up and buy the book now so I can show you how. Added bonuses: When you buy the paperback, you get the Kindle version free.
