Ordinarily people would fast from dawn to dusk for probably an entire month having to endure days on end without proper meals. Then once the benefits of fasting are achieved they would resume normal life only for the problems to creep back again. This can be very frustrating. Fortunately intermittent fasting solves this challenge. Rather than go through lengthy periods of fasting all you need to do is identify the most suitable intermittent type of fasting. For instance you may choose the 16/8 format where you go for 16 hours without eating anything and only eat within an 8 hour window in any given day. Fortunately the 16 hours of fasting include your sleeping time so you will be asleep for about half of that time. Intermittent fasting has gained popularity because it offers choice, is easy to handle and has a lot of benefits but without the rigors and disadvantages of traditional ways of fasting. If you need to lose weight, look great, reduce inflammation, boost your immunity or a myriad of other benefits then you should consider one of the various intermittent fasting methods.
