Business Innovation and Skills BIS has a robust strategy for maximizing the collection performance of student loans and  
improves its information on borrowers it will not be well placed to secure value for money BIS forecasts that the total value  
of outstanding student loans will increase from 46 billion in 2013 to approximately 200 billion by 2042 in 2013 prices The  
number of borrowers due to repay is projected to increase from 3 million in 2012 13 to 6 5 million by 2042 The loan book is  
therefore becoming a substantial public asset BIS and its collection partners HM Revenue Customs and the Student Loans  
Company SLC work together in a joined up way In 2012 13 they collected 1 4 billion in student loan repayments at a cost of  
27m BIS needs to make better use of data to support its collection strategy and improve its understanding of where it could  
invest to maximise the collection value of the loan book In designing how student loans would work BIS anticipated that a  
proportion of the loans would not be repaid However BIS has not set an annual target for the amount to be collected because  
repayments are affected by graduate earnings and economic factors outside its direct control Annual repayment forecasts are  
consistently higher than amounts collected While many borrowers may not be in employment BIS and the SLC have carried  
out little analysis to establish how many may be working overseas or the level of repayments that may be missed      *Guide
