## Tips To Follow The 30-Day Walking Plan

1. Slow is a stroll - approx 25 minutes/mile. Use this easy pace to warm up.
2. Moderate is a normal walking pace - 20 minutes/mile. You can still talk as you walk.
3. Fast is walking at a brisk pace where you're pushing yourself - 1.7 minutes/mile.
4. Complete sessions in one go or split into 2.
5. Repeat a week if you find it too hard.
6. If the plan is too easy increase the intensity of your walks with intervals or hills.

linked to healthy environments home neighborhood educational institutions workplace leisure spaces etc and a perspective of health interventions as more integrated with society and the environment The role of physiotherapy in this open space enjoys a growing and strong interest anchored in part as a response to the reductionism that a relevant part of clinical research grants to physiotherapy increased with the massive inclusion of technology as a therapeutic and educational mediator Incorporating planetary and population health as well as social and ecological perspectives into physiotherapy pedagogy would facilitate community engagement and sustainability in the field This open approach to physiotherapy allows not only to transform people's lives but also to bring the seemingly distant premises of planetary health to local action It is now urgently necessary to bring scientific research in this area to the surface open new debates and create spaces for future studies based on a more systemic relational and questioning conceptions of the discipline and its eco social role and responsibilities This Research Topic aims to highlight the role of physiotherapy in nature based health promotion interventions in public health initiatives global health and planetary health approaches and many more We will accept all methodologies and study designs including theoretical perspectives To contribute towards the development of this broad scope of physiotherapy this Research Topic calls for submissions on physiotherapy linked to Natural based interventions and health promotion Planetary health from a global local and local global perspective Global health ethics climate justice and human rights Environmental physiotherapy in all its approaches Urban planning and design green and blue cities zones co participation governance and public policies Healthy environments of all types from broad approaches such as healthy cities to other areas such as healthy schools universities workplaces leisure places Use of raw materials in physiotherapy sustainability and eco friendly strategies outdoors natural spaces and environmentally responsible interventions Community participation resilience climate change and health promotion Service learning and community engagement innovative approaches in physiotherapy education We would like to send thanks to the following organizations who are in support of this Research Topic and the articles published
