

# Multiplicative Comparison

A **multiplicative comparison** is a way of comparing two quantities by asking how many times larger or smaller one quantity is than the other quantity. Multiplicative comparisons involve the operations of multiplication and division to solve problems.

Lucas and Ryan are working on a construction project for school. Lucas's wooden board is 5 times the length of Ryan's board. If Ryan's wooden board is 3 feet, how long is Lucas's wooden board?

$5 \times 3 = 15 \rightarrow$  Lucas's board is 15 feet long.

solution Many students often pluck numbers from the problem and plug them into an equation using the first operation they can think of or the last one they practiced Students also tend to choose an operation by solely relying on key words that they believe will help them arrive at an answer which without careful consideration of what the problem is actually asking of them

Mathematize It Going Beyond Key Words to Make Sense of Word Problems Grades 3-5 shares a reasoning approach that helps students dig into the problem to uncover the underlying mathematics deeply consider the problem's context and employ strong operation sense to solve it Through the process of mathematizing the authors provide an explanation of a consistent method and specific instructional strategies to take the initial focus off specific numbers and computations and put it on the actions and relationships expressed in the problem Sure to enhance teachers' own operation sense this user-friendly resource for Grades 3-5 Offers a systematic mathematizing process for students to use when solving word problems Gives practice opportunities and dozens of problems to leverage in the classroom Provides specific examples of questions and explorations for all four operations addition subtraction multiplication and division with whole numbers fractions and decimals Demonstrates the use of concrete manipulatives to model problems with dozens of short videos Includes end of chapter activities and reflection questions How can you help your students understand what is happening mathematically when solving word problems Mathematize it
