**Sound in the Ecstatic-Materialist Perspective on Experimental Music** Riccardo D. Wanke,2021-08-09 What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch noise electronic tracks by Pan Sonic This book proposes that despite their differences they share a particular understanding of sound that is found across several quite distinct genres of contemporary art music the ecstatic materialist perspective Sound in the ecstatic materialist perspective is considered as a material mass or element unfolding in time encountered by a listener for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality It is material by virtue of the focus on the texture consistency and density of sound it is ecstatic in the etymological sense that is to say that the experience of this sound involves an instability an inclination to depart from material appearance an ephemeral and transitory impulse in the very perception of sound to something beyond but still related to it By examining musical pieces from spectralism to electroacoustic domains from minimalism to glitch electronica and dubstep this book identifies the key intrinsic characteristics of this musical perspective To fully account for this perspective on sonic experience listener feedback and interviews with composers and performers are also incorporated Sound in the ecstatic materialist perspective is the common territory where composers sound artists performers and listeners converge
