Potential Health Risks to DOD Firing-Range Personnel from Recurrent Lead Exposure National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Committee on Potential Health Risks from Recurrent Lead Exposure of DOD Firing Range Personnel, 2013-04-20 Lead is a ubiquitous metal in the environment and its adverse effects on human health are well documented Lead interacts at multiple cellular sites and can alter protein function in part through binding to amino acid sulfhydryl and carboxyl groups on a wide variety of structural and functional proteins In addition lead mimics calcium and other divalent cations and it induces the increased production of cytotoxic reactive oxygen species Adverse effects associated with lead exposure can be observed in multiple body systems including the nervous cardiovascular renal hematologic immunologic and reproductive systems Lead exposure is also known to induce adverse developmental effects in utero and in the developing neonate Lead poses an occupational health hazard and the Occupational Safety and Health Administration OSHA developed a lead standard for general industry that regulates many workplace exposures to this metal The standard was promulgated in 1978 and encompasses several approaches for reducing exposure to lead including the establishment of a permissible exposure limit PEL of 50 g m³ in air an 8 hour time weighted average TWA exposure guidelines for instituting medical surveillance guidelines for removal from and return to work and other risk management strategies An action level of 30 g m³ an 8 hour TWA for lead was established to trigger medical surveillance in employees exposed above that level for more than 30 days per year Another provision is that any employee who has a blood lead level BLL of 60 g dL or higher or three consecutive BLLs averaging 50 g dL or higher must be removed from work involving lead exposure An employee may resume work associated with lead exposure only after two BLLs are lower than 40 g dL Thus maintaining BLLs lower than 40

g dL was judged by OSHA to protect workers from adverse health effects The OSHA standard also includes a recommendation that BLLs of workers who are planning a pregnancy be under 30 g dL In light of knowledge about the hazards posed by occupational lead exposure the Department of Defense DOD asked the National Research Council to evaluate potential health risks from recurrent lead exposure of firing range personnel Specifically DOD asked the National Research Council to determine whether current exposure standards for lead on DOD firing ranges protect its workers adequately The committee also considered measures of cumulative lead dose Potential Health Risks to DOD Firing Range Personnel from Recurrent Lead Exposure will help to inform decisions about setting new air exposure limits for lead on firing ranges about whether to implement limits for surface contamination and about how to design lead surveillance programs for range personnel appropriately *Relational Justice* Hanoch Dagan,Avihay Dorfman,2024-09-05 What makes private law private What is its domain What are the values it promotes Relational Justice A Theory of Private Law addresses these foundational questions in a robust analysis of the key doctrines of private law including torts contracts and restitution Discarding the vision of private law as a bastion of negative duties of non interference or efficiency maximization this book reframes private law in terms of what it calls relational justice reciprocal respect for self determination and substantive equality By vindicating self determination private law can forge the horizontal interactions vital to the ability to shape and implement a conception of the good life By structuring these interactions in terms requiring parties to respect one another for who they are private law can cast them as interactions between equals In the book s first part the authors set out a normative position they term relational justice whereby the rules of private law abide by the fundamental maxim of reciprocal respect for self determination and substantive equality The second part of the book applies this framework to an analysis of familiar private law doctrinal areas followed by a third part charting newer areas including workplace safety poverty discrimination and implications for international law Throughout the authors show how relational justice theory provides a normative vocabulary for evaluating core features of existing private law while suggesting directions for necessary or desirable reforms *OSHA Field Operations Manual* U.
