AAMI Standards and Recommended Practices Association for the Advancement of Medical Instrumentation. Sterilization Standards Committee,1994 Virtual Medical Office for Clinical Procedures for Medical Assistants Elsevier Inc,Kathy Bonewit-West,2007-04 Gain realistic experience in a physician s office without leaving the classroom By using

Elsevier's Virtual Medical Office learning system, an Elsevier textbook, a study guide and interactive software, students develop critical thinking and decision making skills they'll need in their externships and on the job. In Virtual Medical Office, students experience patient care from check in through check out, exploring all national curriculum competencies. It shows how to manage different patients and why. Each study guide lesson directs the student through the textbook and software and presents exercises focused on one or two medical assisting competencies at a time based on what they experience. Realistic software simulations of handling a difficult patient, setting up the exam room, and many more bridge the gap between the classroom and the real world. 15 unique cases promote understanding of how the competencies established by ABHES (Accrediting Bureau of Health Education Schools) and CAAHEP (Commission on Accreditation of Allied Health Education Programs) come into play in the workplace. More than two hours of video clips highlight the communication and professionalism competencies of patient care. Realistic information resources are shown such as medical records for each case, an office policy manual, a fee schedule, a daysheet, and more. Performance summaries allow students to compare their decisions for each case to those of an expert and evaluate any differences between the two. A study guide complements textbook content through lessons that correlate reading assignments with patients in the virtual practice. Focuses on one or two competencies in each lesson to create brief, manageable learning experiences. Demonstrates how all CAAHEP and ABHES medical assisting competencies come into play in the workplace. Promotes active learning as students collect information from a variety of sources to make patient care decisions. Encourages critical thinking as students discuss and critique the performance of the medical assistants in the videos. Augments knowledge of HIPPA by directing students to compare the policy manual, the contents of each case's medical record, and what actually happens in the videos. Makes lessons available online, allowing students to complete their assignments and submit them electronically to their instructor. *Saunders Textbook of Medical Assisting* Diane Klieger, 2005 This comprehensive and visually appealing text covers all aspects of both the AAMA and AMT national curricula for medical assisting, including medical terminology, anatomy, physiology, and pathophysiology. The text is written in a reader friendly style and integrates features designed to foster a greater awareness for students of the consequences of their actions on the job as well as to develop greater empathy for the patient's experience. A recurring "Ripples on the Pond" analogy emphasizes this ripple or consequences effect. Case scenarios at the beginning of chapters challenge students to put the chapter content into a real world perspective with follow up questions at the end of chapters that are designed for self reflection, homework assignments, or class discussion. An integrated package includes an interactive skills software program in the text, a student workbook with recall application and critical thinking exercises, a complete instructor's package, and a companion website. A "Ripples on the Pond" theme is designed to help students become more aware of the consequences and the cause and effect of their actions on the job. This theme is

reinforced visually and in content features throughout the text Patient Centered Professionalism boxes throughout chapters help students think about the chapter content in the perspective of the patient's experience so they can develop empathy for the patient and consider how their actions will be experienced by the patient Coverage of national curriculum competencies with a listing of the AAMA and RMA competencies in the instructor's package A correlation grid of chapter objectives to curriculum competencies assures complete compliance with accreditation requirements Two special chapters on student skills and employment provide excellent advice on how to get the most out of the learning experience and how to get a job and succeed in one's career Coverage is included of the three prerequisites of any medical assisting program medical terminology A P and pathology making this an all encompassing text that renders the purchase of additional texts unnecessary Heavily illustrated step by step procedures with charting examples and rationales promote better understanding of how to properly perform all clinical and administrative procedures Weighted competency checklists for all skills are in the student workbook What Would You Do case studies presented at the beginning of each chapter are revisited at the chapter end along with questions to help students develop their critical thinking skills These scenarios and questions also make excellent class or small group discussions or homework assignments Suggested responses are in the instructor's package For Further Exploration boxes suggest topics for further Internet research Internet research activities are available in the student workbook with active links on the companion website that are organized by chapter Summary Keys offer a bulleted review of important points for each learning objective reinforcing the content students must master for each chapter Companion online course follows a generic organizational structure with reading assignments keyed to the Klieger textbook This course can either stand alone as true distance education courses or can be used effectively to reinforce a traditional classroom course An online mentor steps students through a virtual externship as they meet realistic patients physicians and co workers while learning the basic theory and practicing the key curriculum skills *OSHA Standards for the Construction Industry As of August 1, 2002* Toolkit Media Group,2002 Provides the texts of OSHA construction industry standards Law Notes for the General Practitioner ,1964
