The Uncanny in Language, Literature and Culture Sarah Stollman, Charlie Jorge, Catherine Morris, 2024-09-09 In his attempts to define the uncanny Sigmund Freud asserted that the concept is undoubtedly related to what is frightening to what arouses dread and horror Yet the sensation is prompted simultaneously by something familiar establishing a sense of insecurity within the domestic even within the walls of one's own home This disturbance of the familiar further unsettles the sense of oneself A resultant perturbed relationship between a person and their familiar world the troubled sense of home and self certainty can be the result of a traumatic experience of loss and of unresolved pasts resurfacing in the present Memory traces are revised and interwoven with fresh experiences producing an uncanny effect As an externalization of consciousness the uncanny becomes a meta concept for modernity with its disintegration of time space and self The papers in this book seek to explore the representations of the uncanny in language literature and culture applying the origins of the concept to a range of ideas and works *The Routledge Handbook of Accounting for the*

Sustainable Development Goals Andrea Venturelli, Chiara Mio, 2024-11-05 The introduction of Agenda 2030 and its 17 Sustainable Development Goals (SDGs) has traced a path for private and public entities interested in pursuing sustainable development. This handbook identifies the recent challenges in accounting research and the SDGs by exploring the evolutionary pathways and future direction of sustainability reporting. It explores the role of businesses as contributors to Agenda 2030 by assuming a multidisciplinary approach and provides a measure of organisations' contributions to the SDGs through the understanding of business strategies and policies on Agenda 2030 integration. The book represents a substantial and multi-faceted contribution to the debate on SDGs accounting by assembling international scholars and practitioners to effectively explore the practice and theory revolving around the current state of the art and highlight future research pathways. By providing a comprehensive evaluation of accounting for the Sustainable Development Goals, this volume will appeal to a wide variety of readers from students, scholars, researchers, practitioners, and policymakers interested in increasing their awareness of Agenda 2030 and offers a significant contribution to the evolution of accounting practices.

Lehner, 2016-06-23 Routledge Handbook of Social and Sustainable Finance brings together an international cast of leading authorities to map out and display the disparate voices, traditions, and professional communities engaged in social finance activity. With a clear societal or environmental mission, foundations, individual and group investors, as well as public bodies around the world, have become increasingly eager to finance and support innovative forms of doing business. Together, founders and established businesses alike are embracing new sustainable business models with a distinct stakeholder approach to tackle social or environmental problems in what they see as a failed economic system in crisis. As a result, the topic of social and sustainable finance is at the forefront of financial-economic thought. This Handbook is divided up into three parts. The first, *The Landscape of Social and Sustainable Finance and Investments*, comprises chapters from a multitude of perspectives in an effort to grasp the entirety of the landscape. The second, *Challenges, Suggestions, Critiques, and Debates*, focuses on areas ranging from sociological underpinnings to critical takes on markets and the identification of specialized business models. Amongst ethical considerations, topics include the scaling of impact, an analysis of sustainability as risk prevention, and comparative analyses of various methods of justification and measurement. In the third and final section, *Markets and Institutions*, contributions range from various perspectives on sustainable banking to environmental marketplaces and finally on to practical cases and country-specific observations. This volume is essential reading for both

academics and students in economics and finance It is also of interest to those who study environmental economics
