Neotropical Rainforest Mammals A Field Guide:

Neotropical Rainforest Mammals Louise Emmons, 1997 *Neotropical Rainforest Mammals* the first color illustrated field guide to these marvelously diverse and elusive creatures has enjoyed tremendous success since its initial publication in 1990 Ecotourists and field researchers alike have applauded this guide's compact size light weight and durability More important they have appreciated its clear and concise accounts of the mammals of this broad region Each species account includes information on identifying characteristics similar species vocalizations behavior and natural history geographic range conservation status local names and references to the scientific literature In this completely revised and updated second edition A total of 226 species are treated in full 206 were included in the first edition All species accounts retained from the first edition have been updated to include the most recent research All 195 maps showing the distribution and geographic range of each species have been revised to reflect the most current information Twenty nine beautiful color plates illustrate more than 220 species including significant color variants between males and females or adults and young Seven black and white plates contain more than 60 images of individual species mainly bats A compact disc of mammal vocalizations crucial to identifying nocturnal and otherwise cryptic animals that sometimes may be heard rather than seen will be available for purchase separately Praise for the first edition If you can't go to the Central and South American rain forests to see firsthand their threatened ecosystems here is the next best thing Washington Post Book World A large amount of information is presented concisely and in a way that is easy to use Choice The presentation and wealth of information contained in this field guide is outstanding and will satisfy the needs of both the tourist and researcher traveling to the Neotropics Canadian Field Naturalist *Mammals of the Neotropics, Volume 3* John F. Eisenberg, Kent H. Redford, 1989 Despite intense interest in this biologically diverse and ecologically important region the mammals of South America are still not well known Filling a large gap in the literature this volume provides a survey and synthesis of current knowledge of the more than 650 species of land and marine mammals found in Ecuador Peru Bolivia and Brazil Third in a series that reviewers have described as state of the art Journal of Biogeography and invaluable to anyone interested in the mammalian fauna of the Neotropics Quarterly Review of Biology this volume follows the format of its acclaimed predecessors Chapters present not only up to date taxonomic information but also ecological and behavioral characteristics conservation status and distribution maps for most species Numerous illustrations are provided to assist in field and laboratory identification including exquisite color and black and white plates by Fiona Reid New to this volume are chapters contributed by experts on the mammalian fossil record of this region and on its current biodiversity and biogeography An appendix summarizes changes to the nomenclature that have altered the scientific names used in the first two volumes Volumes 1 and 2 of *Mammals of the Neotropics* which are also available describe the mammals of Panama Colombia Venezuela Guyana Suriname and French Guiana volume 1 and Chile Argentina Uruguay and Paraguay volume 2 The fourth and final volume of this series will cover the mammals of Mexico and

Central America **Mammals of North America - Volume 1** Sergio Ticul Álvarez-Castañeda,2024-11-15 The book synthesizes nomenclature systematics and descriptions of North American mammal species Clear simple and illustrated identification keys are provided to make knowledge of mammals easier and facilitate the training both students and professionals in the field including readers without extensive experience Descriptions of the different species are provided up to Order highlighting the diagnostic features that allow identifying them promptly while the reader learns how to make subsequent identifications without having the book at hand Each species comes with potential distribution maps based on existing records in the main museums of North America The book includes the description characteristics and distribution maps of the 781 species with range in the North America subcontinent Mammals of Mexico Gerardo Ceballos,2014-01-15 The most comprehensive reference on Mexico's diverse mammalian fauna Mammals of Mexico is the first reference book in English on the more than 500 types of mammal species found in the diverse Mexican habitats which range from the Sonoran Desert to the Chiapas cloud forests The authoritative species accounts are written by a Who's Who of experts compiled by famed mammalogist and conservationist Gerardo Ceballos Ten years in the making Mammals of Mexico covers everything from obscure rodents to whales bats primates and wolves It is thoroughly illustrated with color photographs and meticulous artistic renderings as well as range maps for each species Introductory chapters discuss biogeography conservation and evolution The final section of the book illustrates the skulls jaws and tracks of Mexico's mammals This unparalleled collection of scientific information on and photographs of Mexican wildlife belongs on the shelf of every mammalogist in public and academic libraries and in the hands of anyone curious about Mexico and its wildlife *International Wildlife Encyclopedia* Maurice Burton,Robert Burton,2002 This twenty two volume set presents the appearance and behavior of thousands of species of animals along with species population and prospects for survival in a arranged alphabetically and easy to read format *Guyana* Kirk Smock,2008 South America's often overlooked English speaking country lies far off the well trodden tourist path Guyana is the ideal destination for the discerning visitor seeking adventure Within its vast interior the Guiana Shield one of the four pristine tropical rainforests left in the world converges with the Amazon Basin creating a unique geography composed of coastal waters mangroves marshes savannas mountains and tropical rainforests Bordered by Venezuela Brazil Suriname and the Atlantic Ocean the lively locals a melting pot of East Indian and African descendants peppered with Chinese Europeans and Amerindians create a culture decidedly more Caribbean than Latin **Mammals of North America - Volume 2** Sergio Ticul Álvarez-Castañeda,2024-12-06 The second volume of this book series synthesizes nomenclature systematics and descriptions of North American mammal species Clear simple and illustrated identification keys are provided to make knowledge of mammals easier and facilitate the training both students and professionals in the field including readers without extensive experience Descriptions of the different species are provided up to Order highlighting the diagnostic features that allow identifying them promptly while the reader learns how to make subsequent
