**Onco-Nephrology E-Book** Kevin W. Finkel, Mark Anthony Perazella, Eric P Cohen, 2019-07-02 Kidney disease and cancer are frequent comorbidities that require specialized knowledge and expertise from both the nephrologist and the oncologist. Written by three pioneers in this growing subspecialty, Onco Nephrology provides authoritative definitive coverage of the mechanism and management of these two life-threatening diseases. This unique single volume resource covers current protocols and recommends management therapies to arrest kidney failure and allow oncologic treatments to continue and succeed. Addresses acute and chronic kidney diseases that develop from a variety of cancers. This includes direct kidney injury from the malignancy, paraneoplastic effects of the cancer, and various cancer agents used to treat the malignancy. Discusses key issues regarding kidney disease in patients with cancer, including conventional chemotherapeutic regimens and new, novel therapies targeted at agents and immunotherapies or the malignancies themselves that may promote kidney injury. Patients with chronic kidney disease who acquire cancer unrelated to renal failure and kidney transplantation, which has been shown to carry an increased risk of cancer. Contains dedicated chapters for each class of the conventional chemotherapeutic agents, targeted cancer agents, and cancer immunotherapies, including the basic science, pathogenic mechanisms of injury, clinical manifestations, and treatment. Includes special chapters devoted to the individual classes of chemotherapies that relate to kidney disease for quick reference. Discusses increasingly complex problems due to more numerous and specialized anti-cancer drugs as well as increased survival rates for both cancer and renal failure requiring long-term patient care. Covers anti-VEGF, anti-vascular endothelial growth factor agents, and cancer immunotherapies, treatments that are being recognized for adverse kidney effects. Utilizes a clear logical format based on the ASN Core Curriculum for Onco Nephrology, making this reference an excellent tool for board review as well as a practical resource in daily practice.
