Pediatric Critical Care Study Guide Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10

This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner.

**Anatomy and Physiology Laboratory Manual and Study Guide** Elizabeth J. Shisler, 1955      A Team-based Learning Guide for Faculty in the Health Professions Dr. David Hawkins, 2014-07-29 Team based Learning is a unique pedagogy designed to engage students in active learning, critical thinking, and problem solving. Students receive immediate feedback in their learning through readiness assurance testing and application exercises. Students also learn and develop skills needed to work in teams and to teach each other as they work through team assignments. This guide provides details on accomplishing the four steps that must be done to design an effective team based curriculum or topic and examples of how those steps have been used to create courses for health professional students.
