Netwerken voor datacommunicatie J. Bakker, 2012 *Information Society* Karamjit S. Gill, 2012-12-06 Human centredness A Challenge to Post industrial Europe The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one s intelligence is always accompanied by positive emotion which in turn further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsof though it seems since to have learnt its lesson *De Kampioen*, 2000-01 De Kampioen is the magazine of The Royal Dutch Touring Club ANWB in The Netherlands It s published 10 times a year with a circulation of approximately 3 5 million copies
