Networks Of Learning Automata Techniques For Online Stochastic Optimization:

Networks of Learning Automata M.A.L. Thathachar,P.S. Sastry,2011-06-27 Networks of Learning Automata Techniques for Online Stochastic Optimization is a comprehensive account of learning automata models with emphasis on multiautomata systems It considers synthesis of complex learning structures from simple building blocks and uses stochastic algorithms for refining probabilities of selecting actions Mathematical analysis of the behavior of games and feedforward networks is provided Algorithms considered here can be used for online optimization of systems based on noisy measurements of performance index Also algorithms that assure convergence to the global optimum are presented Parallel operation of automata systems for improving speed of convergence is described The authors also include extensive discussion of how learning automata solutions can be constructed in a variety of applications **Springer Handbook of Automation** Shimon Y. Nof,2023-06-16 This handbook incorporates new developments in automation It also presents a widespread and well structured conglomeration of new emerging application areas such as medical systems and health transportation security and maintenance service construction and retail as well as production or logistics The handbook is not only an ideal resource for automation experts but also for people new to this expanding field Learning Automata Approach for Social Networks Alireza Rezvanian,Behnaz Moradabadi,Mina Ghavipour,Mohammad Mehdi Daliri Khomami,Mohammad Reza Meybodi,2019-01-22 This book begins by briefly explaining learning automata LA models and a recently developed cellular learning automaton CLA named wavefront CLA Analyzing social networks is increasingly important so as to identify behavioral patterns in interactions among individuals and in the networks evolution and to develop the algorithms required for meaningful analysis As an emerging artificial intelligence research area learning automata LA has already had a significant impact in many areas of social networks Here the research areas related to learning and social networks are addressed from bibliometric and network analysis perspectives In turn the second part of the book highlights a range of LA based applications addressing social network problems from network sampling community detection link prediction and trust management to recommender systems and finally influence maximization Given its scope the book offers a valuable guide for all researchers whose work involves reinforcement learning social networks and or artificial intelligence
