[The Watchman's Rattle](#) Rebecca D Costa,2012-02-29 Why does it feel as if our most challenging problems today the worldwide recession global warming fast spreading viruses terrorism and poverty

aren't getting solved. What if our brain has limits that prevent it from solving such complex problems? If ancient civilisations collapsed because they too hit a cognitive limitation, are we headed for a similar collapse and if so, can it be prevented? Using historical and modern day examples, *The Watchman's Rattle* describes the cognitive gridlock that sets in when complexity races ahead of the brain's ability to manage it. Beginning with the Mayans, Khmer and Roman Empires, Costa shows how the tendency to find a quick fix to problems by focusing on symptoms instead of searching for permanent solutions leads to frightening long term consequences. Society's ability to solve its most challenging intractable problems becomes gridlocked, progress slows and collapse ensues. But as Costa reveals, there is a growing body of scientific evidence that the human brain can be retrained to comprehend, analyse and resolve massively complex problems. A process of intuitive thinking which Neuroscientists refer to as insight. Part history, part social science, part biology, *The Watchman's Rattle* is sure to provoke, engage and incite change.

Keep Your Brain Alive Lawrence Katz, Manning Rubin, 1998-11-01. No more punch lines that just slipped away. No more names on the tip of your tongue. No more senior moments. Drawing on cutting edge neurological research, *how to keep your brain alive* 83 neurobic exercises brings help to everyone whose memory is starting to slip. Devised by Dr Lawrence Katz, a professor of neurobiology at Duke University Medical Center and Manning Rubin, author of *60 Ways to Relieve Stress in 60 Seconds*, here is a regimen of mental cross training that can be done anywhere by anyone at any time of day. The premise is simple: When you exercise the brain, you release natural growth factors called neurotrophins which in turn enhance the brain's level of fitness. And nothing so easily stimulates the brain as breaking routines and using the five senses in new and unexpected ways. So if you're right handed, wake up tomorrow and brush your teeth with your left hand. Or close your eyes before you get into the car and then get the key into the ignition. Every time you open a new circuit in your brain, it's like doing a round of mental sit ups without the pain.
