*Consumer Neuroscience* Moran Cerf, Manuel Garcia-Garcia, 2017-11-16 A comprehensive introduction to using the tools and techniques of neuroscience to understand how consumers make decisions about purchasing goods and services

Contrary to the assumptions of economists consumers are not always rational actors who make decisions in their own best interests The new field of behavioral economics draws on the insights of psychology to study non rational decision making

The newer field of consumer neuroscience draws on the findings tools and techniques of neuroscience to understand how consumers make judgments and decisions This book is the first comprehensive treatment of consumer neuroscience suitable for classroom use or as a reference for business and marketing practitioners After an overview of the field the text offers the background on the brain and physiological systems necessary for understanding how they work in the context of decision

making and reviews the sensory and perceptual mechanisms that govern our perception and experience Chapters by experts in the field investigate tools for studying the brain including fMRI EEG eye tracking and biometrics and their possible use in marketing The book examines the relation of attention memory and emotion to consumer behavior cognitive factors in decision making and the brain's reward system It describes how consumers develop implicit associations with a brand perceptions of pricing and how consumer neuroscience can encourage healthy behaviors Finally the book considers ethical issues raised by the application of neuroscience tools to marketing Contributors Fabio Babiloni Davide Baldo David Brandt Moran Cerf Yuping Chen Patrizia Cherubino Kimberly Rose Clark Maria Cordero Merecuana William A Cunningham Manuel Garcia Garcia Ming Hsu Ana Iorga Philip Kotler Carl Marci Hans Melo Kai Markus Mller Brendan Murray Ingrid L C Nieuwenhuis Graham Page Hirak Parikh Dante M Pirouz Martin Reimann Neal J Roese Irit Shapira Lichter Daniela

Badoc,2020-04-24 Neuroscientific research shows that the great majority of purchase decisions are irrational and driven by subconscious mechanisms in our brains This is hugely disruptive to the rational logical arguments of traditional communication and marketing practices and we are just starting to understand how organizations must adapt their strategies This book explains the subconscious behavior of the neuro consumer and shows how major international companies are using these findings to cast light on their own consumers behavior Written in plain English for business and management readers with no scientific background it focuses on how to adapt marketing and communication to the subconscious and irrational behaviors of consumers the direct influence of the primary senses sight hearing smell taste touch on purchasing decisions and the perception of communications by customers brains implications for innovation packaging price retail environments and advertising the use of nudges and artifices to increase marketing and communication efficiency by making them neuro compatible with the brain's subconscious expectations the influence of social media and communities on consumers decisions when collective conscience is gradually replacing individual conscience and recommendation becomes more important than communication and the ethical limits and considerations that organizations must heed when following these principles Authored by two globally recognized leaders in business and neuroscience this book is an essential companion to marketers and brand strategists interested in neuroscience and vital reading for any advanced student or researcher in this area

thought leader Sandeep Dayal explains how to leverage behavioral psychology social anthropology and neuroscience to decode what goes on in consumer minds and create effective marketing strategies to build the kind of loyalty that fuels today's iconic brands Dayal reveals that most successful cognitive brands are architected around three questions consumers ask themselves Does this brand give me good vibes Does what this brand says make sense to me Will I be happier if I buy this brand These three factors good brand vibes brand sense and brand resolve are the hidden mantra that push customers off the fence of indecision and get them not just to admire but actually buy the brands again and again Branding Between the Ears reveals paradigm shifts in building and executing brands that are informed by a burgeoning body of research in brain sciences and offers a better way to make brands that not just stand out but connect with consumers and embed deeply in their thoughts to drive choice Dayal is the marketing thought leader who predicted that consumer collaboration would be the key factor in winning people's trust online and giving consumers control over their personal information would be central to gaining their trust issues that are unfolding today Now with Branding Between the Ears he provides equally prescient principles and new ideas for gaining the competitive edge in a largely uncertain future and winning with cognitive power brands
