Niceic Technical Manual:

Electrical Installation Designs Bill Atkinson, Roger Lovegrove, Gary Gundry, 2013-02-11 A practical and highly popular guide for electrical contractors of small installations now fully revised in accordance with the latest wiring regulations. The book is a clearly written practical guide on how to design and complete a range of electrical installation projects in a competitive manner while ensuring full compliance with the new Wiring Regulations updated late 2008. The updated regulations introduced changes in terminology such as basic and fault protection and also changed the regulation numbers. This new edition reflects these changes. It discusses new sections covering domestic, commercial, industrial and agricultural projects including material on marinas, caravan sites and small scale floodlighting. This book provides guidance on certification and test methods with full attention given to electrical safety requirements. Other brand new sections cover protective measures, additional protection by means of RCDs, the new cable guidelines for thin wall partitions and Part P of the Building Regulations. Provides simple practical guidance on how to design electrical installation projects including worked examples and case studies. Covers new cable guidelines and Part P of the Building Regulations Electrical Installations in line with 17th edition of the Wiring Regulations BS 7671 2008. New chapters on protective measures and additional protection by means of RCDs, residual current devices. Features new wiring projects such as marinas, caravan sites and small scale floodlighting and street lighting. Fully illustrated including illustrations new to the fourth edition [A Practical Guide to The Wiring Regulations](#) Geoffrey Stokes, John Bradley, 2009-04-15. This best selling text has been revised to reflect the requirements of the 17th Edition of the IEE Wiring Regulations BS 7671 2008. It includes essential information on the new rules applied to special installations or locations such as bathrooms, swimming pool locations, camping, caravan sites, marinas, exhibition and show locations, solar photovoltaic power supply systems and floor and ceiling heating systems amongst others. It presents clear explanations on inspection, testing, certification and reporting, test instruments and test methods as well as covering electricity, the law, standards and codes of practice, assessment of general characteristics, protection against electric shock, thermal effects, overcurrent, undervoltage and overvoltage, isolation and switching, the common rules of equipment selection, switchgear, protective devices and other equipment, wiring systems including the external influences on them and cable installation methods, protective conductors, earthing and protective bonding supplies for safety services, the smaller installation and specialised installations such as outdoor lighting installations in churches, multi occupancy blocks of flats. These topics are addressed with pertinent regulation numbers and a useful appendix lists the relevant Standards. Background guidance and worked examples are provided where appropriate. Like the earlier editions of this text, this new edition will be a useful aid for designers, installers and verifiers of electrical installations, students of the industry wishing to gain better understanding of the many facets of electrical safety and duty holders as defined by the Electricity at Work Regulations 1989.
