Sylvan, 2011-07-17 Nikon's much anticipated D5100 camera is here. This new model replaces the popular D5000 and creates a nice bridge between the more beginner level D3100 and the high end D7000. This book has one goal to teach D5100 owners how to make great shots using their new Nikon camera. Users learn how to use the D5100 to create the type of photos that inspired them to buy the camera in the first place. Everything in the book is in service of creating a great image. Starting with the top ten things users need to know about the camera, photographer Rob Sylvan carefully guides readers through the operating features. Owners get practical advice from a pro on which settings to use when, great shooting tips and even end of chapter assignments **Cryopreservation in Assisted Reproduction** Zsolt Peter Nagy, Alex C. Varghese, Ashok

Agarwal, 2024-07-15 Cryopreservation of oocytes, sperm and ovarian and testicular tissues as well as embryos is one of the most critical procedures to preserve the reproductive capacity of individuals. It is an indispensable part of assisted reproductive technologies as nearly all IVF clinics around the world have embraced the freeze all embryo strategy with no fresh embryo transfers. Advanced platforms such as automation and artificial intelligence are making their way into all aspects of assisted reproductive technologies including reproductive tissue banking process and storage. At the same time lax regulations and lack of training combined with rapid demands of IVF services have resulted in a climate of frequent disaster and catastrophic incidents from the cryo labs that store thousands of patients' embryos for years. With the onset of malpractice lawsuits against the clinics and awards of large compensation to the patients, regulations are getting stricter in this arena to safeguard the integrity of storage systems and industry leaders are developing advanced devices and alarm

systems to remotely monitor storage systems exploring the power of internet AI and automation Therefore there is an urgent need for a comprehensive text in this field based on the introduction of such a wide array of advanced devices newer technologies regulatory frameworks risks and disaster management options With contributions from top internationally recognized scientists and clinicians with expertise in cryopreservation and reproductive technology this book provides a comprehensive overview of the basics of cryobiological processes and a technically detailed presentation on all aspects of cryopreservation of reproductive cells and tissues It presents the current well established procedures as well as novel techniques with the latest innovations described in detail Bringing together the latest information with key thought leaders in the field Cryopreservation in Assisted Reproduction is intended to be the go to resource for all reproductive medicine clinicians embryologists lab technologists IVF lab directors managers and researchers
