3rd edition has been developed to bridge the gap between the foundational concepts and the real world. Students are introduced to the case study methodology for financial accounting which focuses on identifying the issue, understanding implications, developing alternatives and making recommendations. Students must also be able to understand the overall financial reporting landscape and the overall impact of the individual accounting issues. The cases range from introductory level to advanced level and can be used as assignments, exams or for in class discussions. The cases have been developed using IFRS Part I, ASPE Part II or ASNPO Part III as the accounting frameworks providing students with exposure to many different types of organizational structures and have been linked to the CPA Competency Map. Instructors are provided with detailed teaching notes and marking keys that will assist in guiding the class discussions and assessments.

**Paradigms**

**Lost** William Sonn, 2006-02-14 Four times in western history in the 1400s, the early 1800s, the 1880s and again in the mid-20th century we learned to duplicate and disseminate the printed word more cheaply. And each time strange events followed. For with each of these changes in the gritty production of glamorous content, expensive and secret bodies of knowledge abruptly became cheap and easy to spread. Once rare and sometimes disorienting impressions rained down on once sheltered folks. New and otherwise inexpert hands mixed them into whole new breeds of information, myth, logic and viewpoints. There were fantastic scientific advances, mass migrations, bold social experiments, financial upheavals and much bloodshed. In the harrowing decades that followed, powerful new kinds of governments, businesses and groups came to elbow aside old ones. In all of these periods there were great, creaking shifts in politics, wealth, religions and even the way we learn, think and see. And in the last decade the costs of producing and distributing printed knowledge have fallen a fifth time, far and fast and almost to free. *Paradigms Lost* traces the history of the accidents, inventions, forces, eccentrics and geniuses who accelerated information in the past, examines what happened each time they succeeded and provides some background for what, if the past is any guide, may be coming.
